KIYOTAKA ANDO
安藤清隆
CHAIRMAN 董事長

On behalf of the board of directors (“the Board”) of Nissin Foods Company Limited (“Nissin Foods” or the “Company”, together with its subsidiaries, the “Group”), I am pleased to present our annual Environmental, Social and Governance (“ESG”) Report of the Group for the year ended 31 December 2025 (the “Reporting Period”).

As a publicly listed company and a leading food manufacturer in Hong Kong, it is our core mission to deliver high-quality products while sustaining business growth. We are dedicated to embedding ESG principles across our operations, upholding a robust financial position, and continuously strengthening our sustainability performance. ESG considerations are increasingly central to our business strategy, helping us navigate emerging risks, meet stakeholder expectations, and create long-term value for our employees, customers, shareholders, and communities.

本人謹此代表日清食品有限公司（「日清食品」或「本公司」，連同其附屬公司統稱「本集團」）董事會（「董事會」）欣然呈報本集團截至2025年12月31日止年度（「報告期間」）之環境、社會及管治（「環境、社會及管治」）年度報告。

作為公開上市公司及香港領先食品製造商，我們的核心任務是提供令客戶滿意的優質食品，同時締造可持續業務增長。我們致力於將環境、社會及管治原則融入業務營運，維持穩健的財務狀況，並持續提升我們的可持續發展表現。環境、社會及管治考量日漸成為我們業務策略的核心環節，有助我們應對新興風險、回應持份者期望，並為員工、客戶、股東及社區創造長遠價值。

CHAIRMAN'S MESSAGE 董事長寄語

Under the direct oversight of our Board and senior management, we regularly review and refine our ESG practices to ensure they remain aligned with evolving business priorities and stakeholder expectations. This year, we updated our materiality assessment to identify the ESG topics that are most relevant to our operations and stakeholders. The top three material ESG topics are:

在董事會和高級管理層的直接監督下，我們定期檢討及完善我們的環境、社會及管治慣例，確保彼等順應不斷變化的業務需求及持份者期望。本年度，我們更新完善重要性評估，以識別與我們營運及持份者最為相關的環境、社會及管治議題。最重要的三個環境、社會及管治議題為：

Product Safety and Quality 產品安全及質量

As a food manufacturer, ensuring the safety and quality of our products remains fundamental to maintaining consumer trust and protecting public health. We continue to strengthen our food safety management systems, implement stringent quality assurance processes, conduct regular staff trainings, and maintain internationally recognised certifications across our production facilities.

作為食品生產商，確保產品的安全與質量，依然是我們鞏固消費者信任及保障公眾健康體系的根本所在。我們持續強化食品安全管理體系，執行嚴謹的質量保證流程，定期開展員工培訓，並確保各生產設施繼續維持國際認證資格。

Health and Nutrition 健康及營養

As consumer awareness of balanced diets and healthier lifestyles continues to grow, we recognise the importance of enhancing the nutritional profile of our product portfolio. We continue to advance initiatives aimed at improving product formulations, including the gradual reduction of sodium or sugar content in selected products and the development of healthier product options while maintaining the great taste.

隨著消費者對均衡飲食及健康生活方式的認知不斷提升，我們深明提升產品組合營養價值的重要性。我們持續推進優化產品配方的各項舉措，包括逐步降低指定產品的鈉或糖含量，以及在保持美味口感的同時，開發更健康的產品選擇。

Packaging Management 包裝管理

As regulatory attention on packaging waste and consumer expectations for environmentally responsible products continue to increase, we recognise the importance of managing the environmental impact of our packaging across the product lifecycle and supply chain. Over the years, we have been taking progressive steps to optimise packaging design, reduce material usage where feasible and explore more sustainable packaging solutions, including the use of green and recyclable materials.

在監管機構持續加強包裝廢棄物的關注、消費者對環保責任產品的期望不斷提高的背景之下，我們深明管理包裝在產品生命週期及供應鏈中所帶來環境影響的重要性。多年來，我們持續採取循序漸進的措施，優化包裝設計，在可行情況下減少材料用量，並探索更可持續的包裝方案，包括使用綠色環保及可回收物料。

The materiality assessment provided key insights that inform our strategic direction and guide the allocation of resources to areas where we can achieve the greatest impact. These insights help ensure that our ESG initiatives are integrated with business planning and operational decision-making, supporting both short-term performance and long-term resilience.

重要性評估提供關鍵的洞察，為我們的戰略方向提供參考，並引導我們將資源投放至最能發揮影響力的領域。這些洞察有助確保我們的環境、社會及管治措施與業務規劃及營運決策相互融合，兼顧短期表現與長遠韌性。

Our ESG efforts have been organised under four key pillars: Our Planet, Our Product, Our People, and Our Community. Below are the key progress highlights:

我們的環境、社會及管治工作圍繞四大關鍵範疇展開：「我們的地球」、「我們的產品」、「我們的員工」及「我們的社區」。以下為主要進展摘要：

Our Planet: We reinforce our commitment to environmental stewardship by reducing emissions, improving resource efficiency, and enhancing product packaging. To increase the accuracy of our environmental reporting, we refined and expanded our Scope 3 emissions calculation, reflecting our growing understanding of indirect environmental impacts across the value chain. Alongside rolling out additional energy-saving initiatives, we introduced an Easy-Peel Composite Cup to further improve recyclability. Moving forward, we will continue to pursue emission-reduction initiatives, advance sustainable packaging solutions, and evaluate the potential for formal greenhouse gas emissions reduction targets.

我們的地球：我們透過減少排放、提升資源效益及優化產品包裝，強化對環境管理的承諾。為提升環境報告的準確性，我們優化並擴大範圍3排放的計算範圍，反映我們對價值鏈中間接環境影響的認知不斷加深。在推出更多節能措施的同時，我們亦引入了「易剝離組合杯」，進一步提升可回收性。未來，我們將繼續推進減排措施、發展可持續包裝方案，並評估訂立正式溫室氣體減排目標的可行性。

Our Product: Producing high-quality, safe, and sustainable food products is central to our mission. Through strict protocols, industry-recognised certifications, and innovative technologies, we work to safeguard the integrity of our products. In response to rising demand from health-conscious consumers, we have introduced the Baked Grain Crispy Roll 21 to the Hong Kong market as a nutritious, wholesome snack option, further demonstrating our commitment to combining taste, quality, and health benefits.

我們的產品：生產優質、安全且可持續的食品是我們的核心使命。我們透過嚴謹的程序、業界認可的認證及創新技術，致力維護產品的完整性。因應注重健康的消費者需求不斷上升，我們在香港市場推出了「21種綜合穀物脆棒」作為營養健康的零食選擇，進一步體現我們將美味、品質與健康益處相結合的承諾。

Our People: Our employees are fundamental to Nissin Foods' continuous success, and we are committed to fostering an inclusive and supportive workplace that enables growth. Our human resource policies and initiatives promote professional development at all career stages, ensuring a fulfilling experience across all operations. This year, we further strengthened this commitment through specialised training programmes and wellness campaigns, designed to enhance employee capabilities, engagement, and overall welfare.

我們的員工：員工是日清食品持續成功的基石，我們致力營造一個包容、相互支持及共同成長的職場環境。我們的人力資源政策及措施促進不同職業階段的專業發展，確保各營運據點的員工均能獲得充實的體驗。年內，我們透過專門的培訓計劃及福利活動進一步踐行此承諾，旨在提升員工的能力、參與感及整體福祉。

Our Community: We actively contribute to societal well-being through community projects and strategic collaborations that create meaningful social impact. Notable initiatives include our 5th year of operations of CUPNOODLES MUSEUM Hong Kong, scholarship programmes grooming future health educators and food & nutritional sciences professionals, extension of sports sponsorships, and participation in Food Expo 2025. Together, these efforts reinforce our commitment to supporting the communities we serve, promoting creativity and a healthy lifestyle, and creating shared value beyond our core business.

我們的社區：我們開展的社區項目與戰略合作產生積極的社會影響，我們亦因此為創造社會福祉貢獻積極力量。合味道紀念館香港營運步入第五年，推出培育未來的健康教育工作者和食物及營養科學專業人才的獎學金計劃、拓展體育贊助活動、參加美食博覽2025便是成功例證之一。此類活動共同有力地體現我們支持所服務社區、推廣創意與健康生活方式、在核心業務以外創造共同價值的承諾。

Staying true to our Group Philosophy – to be the “Earth Food Creator”, we continue to bring joy through food while advancing our commitment to a healthier, more sustainable future. Looking ahead, we remain committed to strengthening our ESG practices, deepening stakeholder engagement, and exploring opportunities that support both environmental sustainability and social progress.

秉持集團理念 – 成為「地球食品創造者」，我們通過食物持續為社會帶來歡樂，同時不斷踐行邁向更健康、更可持續的未來這一承諾。展望未來，我們將繼續致力強化環境、社會及管治實踐，深化與持份者的互動，並積極探索既能推動環境可持續性、亦能促進社會進步的各種機遇。

2025 MATERIALITY ASSESSMENT

2025年重要性評估

Material Topic Identification

In 2025, we refreshed our prioritisation of material sustainability topics through a comprehensive materiality assessment, further refining the relevance and focus of our ESG strategy. The assessment incorporated desktop research, peer benchmarking, and structured stakeholder engagement to capture evolving regulatory developments, industry trends and stakeholder expectations. Based on this process, we identified and prioritised 14 core sustainability topics that represent the most significant ESG issues for the Group.

This year’s assessment also incorporated four newly introduced topics to reflect the changing risk landscape and stakeholder priorities. *Occupational Health and Safety* was included to further strengthen our focus on safeguarding employees and maintaining safe working environments across all operations. *Labour Rights and Standards* was added in response to increasing global attention on responsible employment practices and ethical supply chains. *Complaints Handling Mechanism* was introduced to reinforce transparency and ensure that stakeholder concerns can be addressed through clear and effective channels. In addition, *Customer Data Privacy and Data Security* was incorporated to reflect rising cyber security risks and growing expectations regarding the responsible handling and protection of customer information. Together, these updates ensure that our ESG priorities remain aligned with emerging sustainability challenges and the expectations of our stakeholders.

Material Topic Prioritisation

Building on the assessment framework established in 2024, we further refined our approach in 2025 to strengthen the robustness and transparency of our prioritisation process. During the year, we engaged our key stakeholder groups through targeted online surveys to evaluate the relevance and significance of identified ESG topics. The survey was designed to systematically capture stakeholders’ perspectives on both the impact materiality and the financial materiality of each issue, enabling a balanced assessment of how our activities affect the environment and society, as well as how sustainability-related factors may influence the Group’s financial performance and long-term value creation.

A total of more than 500 responses were received through the stakeholder surveys. The responses were systematically analysed and consolidated to derive the preliminary scoring for each ESG topic, taking into account the relative importance assigned by stakeholders under both the impact and financial materiality dimensions. This process enabled the Group to establish a structured basis for identifying and prioritising the ESG issues that are most relevant to our operations and long-term development.

重大議題識別

於2025年，我們透過全面的重要性評估，重新審視並釐定可持續發展重大議題的優先次序，進一步提升環境、社會及管治策略的相關性與聚焦点。是次評估結合了案頭研究、同業對標分析及結構化的持份者參與，以掌握不斷演變的監管動態、行業趨勢及持份者期望。基於此過程，我們識別了14項核心可持續發展議題並釐定優先排序，將其作為本集團最具重要性的環境、社會及管治事宜。

本年度的評估亦納入四項新增議題，以反映不斷變化的風險格局與持份者的優先考量。*職業健康與安全*的加入，旨在進一步加強我們對保障員工及在所有營運據點維持安全工作環境的重視。*勞工權利與準則*的增設，則是回應全球對負責任僱傭實踐及道德供應鏈日益增加的關注。*投訴處理機制*的引入，旨在提升透明度，確保持份者的關注能夠透過清晰有效的渠道得到處理。此外，*客戶數據私隱與數據安全*的納入，反映了日益嚴峻的網絡安全風險，以及社會對妥善處理及保護客戶信息的期望不斷提高。綜合而言，上述更新確保我們的環境、社會及管治優先事項始終響應不斷湧現的可持續發展挑戰以及持份者的期望。

重大議題優先排序

在2024年建立的評估框架基礎上，我們於2025年進一步優化相關方法，以提升優先排序流程的穩健性與透明度。年內，我們透過針對性的網上問卷調查，邀請主要持份者群體參與，就所識別的環境、社會及管治議題之相關性及重要性進行評估。該調查旨在有系統地收集持份者對各項議題的影響重要性及財務重要性持有的分析意見，幫助我們客觀評估企業活動對環境與社會的影響，同時了解可持續發展相關因素如何影響本集團的財務表現及長遠價值創造。

我們通過持份者問卷調查共收回逾500份回應，對這些回應進行系統性分析及整合，得出各項環境、社會及管治議題的初步評分，當中考慮了持份者在影響重要性及財務重要性兩個維度下所賦予的相對權重。憑藉此流程，本集團最終建立識別與我們業務運營及長遠發展最為相關的環境、社會及管治議題的結構化基礎，並完成優先排序。

Material Topic Validation

Following the prioritisation process, the preliminary assessment results and scoring outcomes were subject to an internal validation process to ensure their accuracy, relevance and alignment with the Group's strategic direction. The analysis results, including the proposed ranking of ESG topics and the corresponding materiality matrix, were presented to the Board of Directors and the Management Committee for review and discussion.

During this process, senior management and the Board evaluated whether the prioritised topics appropriately reflected the Group's operational realities, risk exposure, regulatory environment and long-term business strategy. Consideration was also given to industry developments, emerging sustainability risks and opportunities, and the expectations of key stakeholders. Based on this review, the Board and the Management Committee confirmed the final list of material ESG topics and endorsed the results of the materiality assessment.

Communication and Planning

The materiality assessment confirmed that the identified sustainability topics are closely aligned with the Group's strategic direction and operational priorities. The assessment also highlighted several emerging areas of importance, including Customer Data Privacy and Data Security and Complaints Handling Mechanism, which were incorporated following a comprehensive evaluation based on the principles of double materiality. These additions reflect the evolving regulatory landscape, increasing digitalisation of business operations and heightened expectations from consumers and other stakeholders regarding transparency, accountability and responsible data management.

Following the validation of the material topics, the Group has integrated the assessment outcomes into its sustainability management and planning processes. Relevant departments and business units are responsible for addressing the identified topics through targeted policies, operational measures and improvement initiatives. The prioritised topics also serve as a key reference for establishing sustainability objectives, monitoring performance indicators and guiding internal resource allocation to ensure that the most significant ESG risks and opportunities are systematically managed.

To ensure continued relevance, the Group regularly reviews and monitors the materiality of ESG topics in light of changes in the operating environment, regulatory developments and stakeholder expectations. The results of the assessment and subsequent actions are communicated through our sustainability disclosures and other stakeholder engagement channels, enabling stakeholders to understand how the Group identifies, manages and responds to key sustainability issues.

MATERIALITY MATRIX 2025

Under the double materiality framework, we assessed 14 ESG topics that are considered most relevant to the Group's operations and long-term development. The results of the assessment are presented in the materiality matrix below, which reflects the relative significance of each topic in terms of its potential financial impact on the Group and its impacts on the environment and society. Based on the final scoring, the topics were categorised into three tiers to indicate their relative level of importance.

重大議題核證

完成重大議題核證後，本集團將評估結果融入可持續發展管理及規劃流程。相關部門及業務單位負責透過針對性的政策、營運措施及改進計劃執行所識別議題的相關工作。已釐定優先次序的議題亦作為制定可持續發展目標、監察績效指標及引導內部資源配置的關鍵參考，確保最具重要性的環境、社會及管治風險與機遇得到系統化管理。

為確保議題的持續相關性，本集團會因應營運環境變化、監管規定更新及持份者期望的轉變，定期檢視及監察環境、社會及管治議題的重要性。評估結果及後續行動將透過我們的可持續發展披露及其他持份者互動渠道予以傳達，讓持份者了解本集團如何識別、管理及回應關鍵的可持續發展議題。

The 14 topics identified through the assessment received different materiality ratings from both senior management and external stakeholders. Among them, *Product Safety and Quality*, *Health and Nutrition*, *Packaging Management*, *Supply Chain and Sourcing*, and *Customer Data Privacy and Data Security* emerged as the five most material ESG topics for the Group.

- The continued prominence of **Product Safety and Quality** and **Health and Nutrition** reflects their fundamental importance to the Group's business model as a food manufacturer. Ensuring that products consistently meet stringent quality and safety standards is essential for protecting consumer health, maintaining regulatory compliance and safeguarding brand reputation. At the same time, increasing public awareness of balanced diets and healthier food choices has heightened stakeholder expectations for food manufacturers to improve the nutritional profile of their products.
 - **Packaging Management** and **Supply Chain and Sourcing** were identified as key ESG priorities, highlighting their direct environmental and social implications across the product lifecycle. Heightened regulatory attention on packaging waste, particularly plastics, alongside increasing consumer awareness of environmental issues, has intensified expectations for food manufacturers to adopt more sustainable packaging solutions and improve resource efficiency. At the same time, responsible supply chain management has become increasingly important in ensuring product quality, maintaining operational resilience and addressing environmental and social risks associated with upstream sourcing.
 - **Customer Data Privacy and Data Security**, introduced as a new topic in this year's assessment demonstrated strong performance across both materiality dimensions. This reflects the rapid digitalisation of consumer engagement channels, including e-commerce platforms, loyalty programmes and digital marketing activities, which involve the collection and processing of customer information. As cyber threats and regulatory scrutiny continue to intensify globally, stakeholders increasingly expect companies to implement robust data protection measures and effective information security governance.
- 經過評估識別的14項議題，均獲高級管理層及外部持份者給予不同重要性的評級。其中，**產品安全及質量**、**健康及營養**、**包裝管理**、**供應鏈及採購**，以及**客戶數據私隱與數據安全**，成為本集團最具重要性的五項環境、社會及管治議題。
- **產品安全及質量**、**健康及營養**持續突出的優先排序反映其對本集團作為食品生產商的業務模式具有根本重要性。確保產品持續符合嚴格的質量及安全標準，對保障消費者健康、維持監管合規性及維護品牌聲譽至為關鍵。與此同時，公眾對均衡飲食及更健康食品選擇的認知不斷提升，亦促使持份者對食品生產商在提升產品營養價值方面寄予更高期望。
 - **包裝管理**以及**供應鏈及採購**被識別為關鍵的環境、社會及管治優先事項，彰顯其在產品生命週期中直接涉及環境與社會影響。監管機構對包裝廢棄物(尤其是塑料品)的關注不斷加強，加上消費者對環境議題的認知日益提升，促使食品生產商在採納更可持續的包裝方案及提升資源效益方面面臨更高期望。與此同時，負責任的供應鏈管理在確保產品質量、維持營運韌性以及應對上游採購相關的环境與社會風險方面，發揮日益重要的作用。
 - **客戶數據私隱與數據安全**作為本年度評估的新增議題，在兩個重要性維度均展現出強勁表現，反映消費者互動渠道的快速數字化，包括電子商務平台、忠誠會員計劃及數字營銷活動等，均涉及客戶信息的收集與處理。隨著網絡威脅及監管審查在全球範圍內持續加劇，持份者對企業實施穩健的數據保護措施及有效的信息安全治理，期望日益提高。

BOARD-LEVEL GOVERNANCE

Our ESG governance is overseen at the highest level, with the Board directly accountable for the Company's ESG strategy, risks, and opportunities. This top-down approach ensures ESG issues consistently receive strategic focus and are embedded in corporate decision-making. Specific ESG duties are delegated by the Board to the Management Committee, which includes Executive Directors, senior management, and business unit heads, led by the Chief Executive Officer. This committee reviews the Group's ESG performance in detail and reports its findings and recommendations to the Board annually.

The Board is regularly informed about sustainability-related risks and opportunities through structured reporting. The Management Committee conducts an in-depth annual review of the Group's ESG performance and presents its findings and recommendations directly to the Board, ensuring sustainability considerations are consistently embedded in the oversight of the Group's strategy, major transactions, and risk management processes.

To strengthen ESG governance effectiveness, our senior management and Board members receive ongoing training on the latest ESG and sustainability developments, including evolving reporting standards for listed companies. This consists of an annual director training programme led by our internal and external professional staff, which covers regulatory updates from the Hong Kong Exchanges and Clearing Limited ("HKEX"), changes to the Companies Ordinance, the expansion to a paperless regime, and emerging climate-disclosure trends. The capability building at the senior management level equips Nissin Foods' leadership to guide the Company's sustainability efforts with up-to-date knowledge.

Our ESG strategy undergoes a thorough review to ensure alignment with Nissin Foods' sustainability goals and corporate values. Insights from risk interviews with non-independent directors and management across key departments and subsidiaries are incorporated into the Enterprise Risk Management (ERM), ensuring that ESG risks are actively managed and supervised at the highest level of the organisation.

MANAGEMENT-LEVEL GOVERNANCE

At the management level, senior executives are accountable for overseeing the practical execution of plans to address sustainability-related risks and opportunities. Business unit heads and managers are being delegated the responsibilities to implement ESG risk management procedures and mitigation strategies. In 2025, we further refined our risk management framework by conducting a thorough review and refreshing our operational risk assessment. This process ensures our risk profile accurately captures both the current external landscape and internal operational dynamics, as well as newly emerging ESG-related challenges. Moving beyond compliance, this detailed review strengthens our agility and responsiveness in addressing the rapidly evolving ESG landscape. It reflects our ongoing commitment to continuously enhance our governance and risk management strategies, ensuring they remain aligned with global best practices and the dynamic nature of sustainability issues.

Nissin Foods maintains a strong and clear framework to uphold integrity and prevent corruption. Our commitment is demonstrated through detailed policies and active measures that promote a culture of honesty, transparency, and accountability. We enforce a strict zero-tolerance stance against bribery, fraud, and corruption in all aspects of our business. Our Anti-Bribery and Corruption guidelines, supported by our Whistleblowing Policy, form the cornerstone of our ethical conduct. These documents provide clear direction to our directors, officers, and employees on meeting legal and ethical standards, ensuring responsibility and reinforcing an environment where principled behaviour is fundamental.

ANTI-BRIBERY AND CORRUPTION

Our Anti-Corruption Policy, along with the Anti-Bribery Policy, Employee Handbook, Nissin Foods Group Code of Conduct, and Internal Compliance Policy, governs the actions of all directors, officers, and employees. These documents establish clear guidelines for engaging in business with integrity and ethical standards, thereby significantly mitigating the risk of corruption and bribery.

At the core of our ethical governance is the Internal Audit Department (IAD), which plays a crucial role in identifying potentially fraudulent activities and enhancing compliance with regulations. The IAD reports significant violations to the Board each year, detailing notable fraud incidents and the findings from investigations. The Board bears the ultimate responsibility for effectively monitoring and managing related risks.

In 2025, we reinforced our commitment to ethical practices by conducting a series of contract risks and law-related training sessions for our employees. The training series is part of our ongoing effort to ensure regulatory compliance and uphold high ethical standards in our sales practices, while promoting a culture of compliance and ethical conduct. We continuously monitor the regulatory landscape and update our ethical policies to maintain the highest standards of integrity across all operations. During the reporting period, no legal proceedings were concluded against Nissin Foods or any of our staff concerning corrupt practices.

WHISTLEBLOWING

We maintain clear and accessible whistleblowing policies to support the reporting of fraud and misconduct. The Whistleblowing Policy applies to the Company and all its subsidiaries, providing explicit guidance for directors, officers, employees, and stakeholders on how to submit reports with guaranteed confidentiality and the option to report anonymously.

Upon receipt, reports are investigated internally or referred to external parties as appropriate. Following the investigation, the Group's Compliance Committee prepares a summary of findings, outlining impacts and recommending corrective actions. Relevant management then reviews the case to determine any necessary disciplinary steps, with the Compliance Committee providing oversight to ensure fairness and thorough consideration before final decisions are made.

In 2025, we conducted a scheduled review of our Whistleblowing Policy to ensure it remains aligned with regulatory developments and best practices in governance. Regular evaluation and refinement of our policies are essential to sustaining accountability across our operations and upholding our core values of honesty and integrity in all aspects of our business.

OUR PLANET

我們的地球

OUR PLANET 我們的地球

With a strong sense of responsibility, we recognise that sustainable business practices are fundamental to protecting the planet for future generations. Our environmental efforts reflect a unified vision to operate responsibly, strengthen resource management, and align our actions with globally recognised sustainability objectives. Beyond meeting regulatory requirements, we continue to advance innovative practices and rigorous standards that enhance our overall environmental performance and reinforce our role in safeguarding our planet.

EMISSIONS

Overview of GHG Emissions in Our Operations

We have continued to track and control our Greenhouse Gas (“GHG”) emissions, with a focus on emissions from our manufacturing operations this year. By identifying key emission sources and implementing targeted reduction measures, we made significant progress in reducing our environmental impact. Our efforts remain focused on reducing our carbon emissions and ensuring that our business practices align with global sustainability objectives.

To enhance the accuracy and credibility of our emissions data, we engaged an independent consultant to conduct a comprehensive carbon assessment. The assessment follows international standards, including ISO 14064, and adheres to guidelines issued by the National Development and Reform Commission in Chinese Mainland, as well as applicable building standards in Hong Kong.

With our decarbonisation initiatives well underway, we continue to closely track and monitor our greenhouse gas emissions performance across our operations. In 2025, our total carbon emissions moderately increased compared with the previous year, primarily due to the expansion of our reporting boundary to include three additional manufacturing facilities. The inclusion of these sites provides a more comprehensive representation of the Group’s operational emissions. Going forward, we will continue strengthening our energy management practices and improving operational efficiency to help mitigate potential emissions growth as our business develops.

During the year, we also further refined our Scope 3 greenhouse gas accounting to enhance the completeness and robustness of our value chain emissions disclosure. Scope 3 emissions were calculated across ten categories in 2025. In particular, emissions from *Capital Goods* were assessed and disclosed for the first time, capturing emissions associated with the production of machinery, equipment and other long-term assets acquired for our operations. This improvement enhances the coverage of our Scope 3 inventory and strengthens our understanding of indirect emissions associated with the Group’s upstream activities.

Air Quality Control

At Nissin Foods, we maintain a strict maintenance schedule for our coiled fans and dust collection systems to ensure that emissions from our production processes comply with regulatory requirements. This proactive approach is essential for maintaining air quality within our facilities and limiting overall air pollution.

Moreover, we are taking firm steps to manage emissions from our company vehicles. Regular inspections help maintain operational efficiency and minimise environmental impact. In addition, we are phasing out gasoline-powered vehicles and progressively transitioning our general passenger fleet into electric alternatives.

本集團懷著高度的責任感，且深知可持續的業務實踐對保護地球、惠澤後代至關重要。我們的環境工作體現了一個統一願景：以負責任的方式營運、加強資源管理，並使我們的行動與全球公認的可持續發展目標保持一致。在滿足監管要求的基礎上，我們持續推進創新實踐及嚴格標準，以提升整體環境表現，並鞏固我們在保護地球方面的角色。

排放物

我們營運中的溫室氣體排放概要

我們持續追蹤及控制溫室氣體排放，本年度重點關注生產業務的排放情況。透過識別主要排放源及實施針對性的減排措施，我們在減少環境影響方面取得了顯著進展。我們的工作始終聚焦於減少碳排放，並確保業務實踐與全球可持續發展目標保持一致。

為提升排放數據的準確性及可信度，我們委聘獨立顧問進行全面的碳評估。該評估遵循國際標準，包括ISO 14064，並遵從中國內地國家發展和改革委員會發布的指引，以及香港適用的建築標準。

隨著我們的減碳舉措穩步推進，我們持續密切追蹤及監察營運過程中的溫室氣體排放表現。於2025年，我們的總體碳排放較上一年度略有增加，主要由於報告範圍擴大，納入三個新增的生產設施。納入該等設施可更全面地描繪本集團的營運排放。未來，我們將持續加強能源管理實踐並提升營運效率，以助減低業務發展過程中可能出現的排放增長。

年內，我們亦進一步優化範圍3溫室氣體核算，以提升價值鏈排放披露的完整性與穩健性。2025年，範圍3排放的計算細分至10個類別。其中，資本貨物的排放首次被評估及披露，涵蓋為營運而購置的機器、設備及其他長期資產在生產過程中所產生的排放。此項優化提升了我們範圍3排放清單的覆蓋範圍，並加深我們對本集團上游活動相關間接排放的信息掌握程度。

空氣質量控制

日清食品嚴格執行風機及除塵系統的維護計劃，確保生產過程的排放符合監管要求。此主動措施對維持設施內的空氣質量及控制整體空氣污染至關重要。

此外，我們正採取堅定措施管理公司車輛的排放。定期檢查有助維持營運效率，並將環境影響降至最低。與此同時，我們正逐步淘汰汽油動力車輛，並將一般乘用車隊逐步過渡至電動車輛。

OUR PLANET 我們的地球

In 2025, we continue to reduce volatile organic compound (“VOC”) emissions from our packaging operations. Dry lamination traditionally releases VOCs that contribute to ground-level ozone and fine particles. Building on our earlier improvements, we further advance the use of solvent-free lamination, which has steadily reduced VOC emissions over the past four years. We also continued expanding the use of water-based gravure inks since 2023 for printing our instant noodle packaging bags to further reduce VOC emissions.

This year, we reduced VOC emissions from our operations by 308.47 tonnes by using solvent-free lamination. The transition also lowered energy consumption, resulting in a reduction of 920.27 tonnes of CO₂. The adoption of water-based gravure inks contributed to an additional 86.31 tonnes of VOCs being reduced.

Looking forward, we are continuing to explore the broader application of water-based gravure inks across more colours and packaging materials. Our ongoing adoption of cleaner technologies reflects our dedication to minimising environmental impact and continuously enhancing our sustainability performance.

Rigorous Adherence to Environmental Laws and Regulations

Compliance with local laws and regulations remains a top priority across all regions where we operate. In Hong Kong, we comply with emission-related requirements, including the Ozone Layer Protection Ordinance and the Air Pollution Control Ordinance. In the Chinese Mainland, we operate in full compliance with the Environmental Protection Law and the Energy Conservation Law. We also actively monitor evolving regulatory developments to ensure we stay ahead of new requirements and adjust our practices promptly.

USE OF ENERGY

Our approach to energy efficiency and sustainability spans all areas of our operations, from everyday employee practices to process enhancements and major infrastructure initiatives.

Energy Saving Awareness

We recognise the importance of cultivating an energy-conscious mindset across the organisation. At Nissin Foods, our environmental protection and energy conservation guidelines are embedded in our daily operations rather than treated as standalone policies. We encourage employees to adopt energy-saving initiatives, recognising that responsible use of air conditioning, ventilation, and lighting through behavioural changes can contribute to meaningful reductions. To reinforce this, we conduct awareness programs designed to inform and motivate our employees to integrate energy-efficient practices into their working procedures.

於2025年，我們持續減少包裝工序中揮發性有機化合物的排放。傳統的乾式覆膜工藝會釋放揮發性有機化合物，加劇地面臭氧及微細顆粒物的形成。在過往改進的基礎上，我們進一步推廣使用無溶劑覆膜技術，過去四年持續降低了揮發性有機化合物的排放。同時，自2023年起，我們持續擴大水性凹版油墨在即食麵包裝袋印刷中的應用，以進一步減少揮發性有機化合物的排放。

於本年度，我們透過採用無溶劑覆膜技術，使營運中的揮發性有機化合物排放減少了308.47噸。此項轉變同時降低了能源消耗，從而減少了920.27噸二氧化碳排放。水性凹版油墨的應用，則額外減少了86.31噸揮發性有機化合物排放。

未來，我們將持續探索水性凹版油墨在更多顏色及包裝材料上的廣泛應用。我們持續採用更清潔的技術，體現了我們致力將環境影響降至最低，並不斷提升可持續發展表現的決心。

嚴格遵守環境法律及法規

遵守當地法律法規是我們在所有營運地區第一優先考慮的方面。在香港，我們遵守與排放相關的要求，包括《保護臭氧層條例》及《空氣污染管制條例》。在中國內地，我們嚴格遵守《環境保護法》及《節約能源法》。我們亦積極監察不斷演變的監管動態，以確保及早應對新規定，並適時調整實務。

能源使用

我們在能源效益及可持續發展方面的方針，涵蓋營運各個層面一由員工的日常實踐，到流程優化及重大基礎設施項目，均貫徹其中。

節能意識

我們深明在整個機構內培養節能意識的重要性。在日清食品，我們的環境保護及節能指引已融入日常營運之中，而非作為獨立政策實施。我們鼓勵員工推行節能措施，認識到透過改變行為習慣，合理使用空調、通風及照明系統，可帶來顯著的減排效果。為加強此理念，我們舉辦宣傳活動，旨在引導及激勵員工將節能實踐融入日常工作流程。

Energy Efficiency Measures

Air Conditioning System Renovation

We recognise that air conditioning systems are essential to maintaining a stable production environment, and upgrading them is key to improving efficiency, ensuring reliability, and supporting our environmental goals.

To improve energy efficiency at our Zhejiang production site, we upgraded its air conditioning system in 2025. A 69 kW air conditioning system was replaced with two 10 kW units and a 5 kW unit, providing a more flexible and energy-saving cooling solution aligned with actual operational needs.

The optimisation resulted in a reduction of approximately 196,650 kWh in annual electricity consumption, which is estimated to reduce 116.85 tonnes of CO₂ emissions annually.

Vacuum Freeze Dryer Optimisation

We understand that vacuum freeze drying is an energy-intensive process, and upgrading this system offers significant potential for electricity savings. Advancing energy efficiency in our manufacturing processes remains a key focus in reducing our operational carbon emissions.

In 2025, Shunde Nissin completed a technical upgrade of its vacuum freeze dryer system to enhance operational energy efficiency. The project involved replacing three existing vacuum pumps and one water ring vacuum pump with higher-efficiency alternatives. Following the upgrade, electricity consumption per drying batch was reduced from 800 kWh to 499 kWh, representing a 37.6% improvement in energy performance. On an annualised basis, the optimisation is expected to deliver electricity savings of approximately 79,464 kWh, contributing to lower operating costs and reduced indirect greenhouse gas emissions associated with power consumption.

Upgrading of Boilers

We continue to advance our sustainability agenda through targeted improvements in production infrastructure. As part of these efforts, we have focused on upgrading core equipment to reduce emissions through energy-efficiency enhancements, such as boiler placement.

In 2025, Zhejiang Nissin replaced its existing boiler with a new high-efficiency steam-generation model. The hardware upgrade improved overall boiler efficiency from 92% to 95%, resulting in a 4% reduction in natural gas consumption per tonne of steam. This can help the facility reduce annual natural gas consumption by 8,610 m³. These energy efficiencies translate into an estimated reduction of 18.94 tonnes of CO₂ emissions each year.

LED Lighting & Lighting Controls

Across our operations, we continue to advance energy-saving measures that reduce electricity consumption and lower our carbon emission. In Hong Kong, we have completed a full transition to LED in all facilities, replacing conventional light tubes with high-efficiency alternatives. Achieving 100% LED coverage has enabled us to cut electricity usage by approximately 19,000 kWh each year, contributing to measurable reductions in CO₂ emissions. Building on this momentum, we have implemented similar enhancements at our Zhejiang site to further strengthen the environmental performance of our production operation.

節能措施

空調系統改造

我們深明空調系統對維持穩定生產環境至關重要，而升級改造此等系統是提升效率、確保可靠性及支持環境目標的關鍵所在。

為提升浙江生產基地的能源效益，我們於2025年對其空調系統進行了升級改造。原有的69千瓦空調機組被更換為兩台10千瓦及一台5千瓦機組，提供更靈活且節能的冷卻方案，以配合實際營運需求。

此項優化使每年用電量減少約196,650千瓦時，預計每年可減少116.85噸二氧化碳排放。

真空冷凍乾燥機優化

我們明白真空冷凍乾燥屬高能耗工序，升級此系統具備顯著的節電潛力。提升生產流程的能源效益，依然是我們減少營運碳排放的重點方向。

2025年，順德日清完成真空冷凍乾燥系統的技術升級，以提升營運能源效率。該項目將三台現有真空泵及一台水環式真空泵更換為更高效率的型號。升級後，每批次乾燥的用電量由800千瓦時降至499千瓦時，能源表現提升37.6%。按年計算，此項優化預計可節省約79,464千瓦時的用電量，有助降低營運成本及減少與用電相關的間接溫室氣體排放。

鍋爐升級

我們透過針對性的生產基礎設施改進，持續推進可持續發展工作。作為相關工作的一部分，我們聚焦於核心設備的升級，例如透過鍋爐佈局的優化來提升能源效益，從而減少排放。

於2025年，浙江日清將其原有鍋爐更換為新型高效蒸汽生產鍋爐。此項硬件升級使鍋爐整體效率由92%提升至95%，每噸蒸汽的天然氣消耗量因而減少4%。此舉有助該廠房每年減少天然氣用量8,610立方米。該等能源效益轉化為每年預計減少18.94噸二氧化碳排放。

LED照明&照明控制

我們在所有營運據點持續推進節能措施，以減少用電量及降低碳排放。在香港，我們已完成所有設施全面更換為LED照明，以高效能產品取代傳統光管。實現100% LED覆蓋率，使我們每年減少約19,000千瓦時用電量，為二氧化碳減排帶來可觀貢獻。乘著此良好勢頭，我們在浙江廠房亦實施了類似改進，進一步強化生產營運的環境表現。

OUR PLANET 我們的地球

Zhejiang Nissin replaced existing LEDs with higher-efficiency LED fixtures in its production areas. This improvement is expected to reduce annual electricity consumption by approximately 101,678 kWh and estimated CO₂ emissions by 127.12 tonnes each year.

Solar Lighting

We continue to explore renewable energy solutions that reduce reliance on conventional power sources. Solar-powered lighting has become an important component of this effort by offering a self-sustaining alternative that supports both energy efficiency and long-term carbon reduction.

Optimising Steam Consumption

Efficient steam management plays a critical role in enhancing operational performance and reducing energy use across our production processes. Through continuous operational optimisation, we strengthen both our operational sustainability and environmental performance.

Promoting Energy Saving Practices

In 2025, we redesigned the bottom of Wintai Factory's ready meal plastic tray into a concave shape to improve heat distribution, enabling faster and more efficient microwave reheating. Serving tests showed an average of 9% reduction in microwave reheating time, supporting significant energy savings. This upgrade lowers the energy required by consumers during reheating and supports our broader energy-efficiency efforts.

Use of Renewable Energy in our Operations

In 2025, we continued to advance our transition towards renewable energy by further expanding the deployment and monitoring of solar power systems across our operations. To date, more than 9,500 solar panels have been installed across our facilities in Hong Kong and the Chinese Mainland. During the year, the solar panel systems generated over 5,675 MWh of renewable electricity. To ensure optimal performance, we conduct monthly monitoring of their energy output, operational efficiency and associated energy savings. The electricity generated from these solar installations contributed to a reduction of more than 3,200 tonnes of CO₂e emissions in 2025.

Looking ahead, we will continue to explore opportunities to expand our renewable energy capacity, including further optimisation and potential expansion of our solar power systems. These efforts will support our ongoing initiatives to reduce operational emissions, enhance energy efficiency and prepare for evolving regulatory requirements related to climate and energy management. By progressively increasing the share of renewable energy used in our operations, we aim to strengthen the environmental performance of our manufacturing processes and contribute to a more sustainable operating model over the long term.

浙江日清在生產區域將原有LED燈具更換為更高效率的LED燈具。此項改進預計每年可減少用電量約101,678千瓦時，並預計每年減少127.12噸二氧化碳排放。

太陽能照明

我們持續探索可再生能源方案，以減少對傳統電源的依賴。太陽能照明已成為此項工作的重要組成部分，提供可自給自足的替代方案，同時支持能源效益及長遠減碳目標。

優化蒸汽消耗

高效的蒸汽管理對提升生產流程的營運表現及減少能源使用至關重要。透過持續的營運優化，我們同時強化了營運的可持續性及環境表現。

推廣節能實踐

2025年，我們將永泰工廠即食餐塑膠托盤的底部重新設計為凹形，以改善熱量分布，實現更快速、更高效的微波復熱。測試結果顯示，微波復熱時間平均縮短9%，實現顯著節能。此項升級降低了消費者在復熱過程中的能耗，並支持我們更廣泛的節能工作。

營運中可再生能源的使用

2025年，我們持續推進可再生能源轉型，進一步擴大太陽能發電系統在營運場所的部署與監測。至今，我們在香港及中國內地的設施已安裝超過9,500塊太陽能板。年內，太陽能板系統共產生逾5,675兆瓦時的可再生電力。為確保最佳效能，我們每月監測其發電量、運作效率及相關節能成效。2025年，該等太陽能裝置所產生的電力，有助減少超過3,200噸二氧化碳當量的排放。

展望未來，我們將繼續探索提升可再生能源產能的空間，包括進一步優化及適時擴展太陽能發電系統。此等措施將有助支持我們持續推動減少營運排放、提升能源效益，並為適應與氣候及能源管理相關的監管要求更新打下基礎。透過逐步提高可再生能源在營運中的使用比例，我們致力強化生產流程的環境表現，長遠構建更可持續的營運模式。

ENVIRONMENTAL AND NATURAL RESOURCES MANAGEMENT

Our Environmental Management System

We have established a strong environmental governance framework, anchored in our ISO 14001-certified Environmental Management System (EMS). This system guides operational decisions that may affect the environment, ensuring our actions consistently reflect our efforts to responsible stewardship. Most of our production facilities in Hong Kong, Chinese Mainland, and oversea regions have adopted the ISO 14001 standard, covering critical areas, including wastewater treatment, waste management, and routine legionella testing in cooling water towers. In 2025, no non-compliance cases related to environmental issues are identified.

EMS Oversight and Leadership

Our EMS committee meets twice a year to review emerging environmental laws, regulatory updates, and compliance issues. These meetings bring together representatives from multiple departments, reinforcing a unified and accountable approach to managing environmental matters.

EMS-related recommendations are integrated into the awareness training under our Integrated Management System (IMS). All new employees are required to complete this training, which covers our EMS policy, objectives, and best practices. A follow-up quiz, along with reviews of any non-conforming cases, ensures a clear understanding of EMS requirements and supports consistent compliance across the organisation.

Our Chief Production Officer serves as the Management Representative, with overall responsibility for environmental management decisions. These decisions are made collaboratively, with each department proposing annual environmental goals and implementation plans. These proposals are reviewed during the second EMS Committee Meeting, after which the Management Representative finalises the objectives and associated programs. Committee members are then accountable for achieving these goals and monitoring progress, ensuring effective and coordinated execution across the organisation.

環境及天然資源管理

環境管理系統

我們已建立穩健的環境管治框架，以通過ISO 14001 認證的環境管理系統為基石。該系統可能影響環境的營運決策，確保我們的行動始終體現對負責任管理的追求。我們位於香港、中國內地及海外的大部分生產設施均已採用ISO 14001標準，涵蓋廢水處理、廢棄物管理及冷卻水塔常規軍團菌檢測等關鍵領域。於2025年，並無發現與環境問題相關的不合規個案。

環境管理系統監督與領導層

我們的環境管理系統委員會每年舉行兩次會議，審視新興的環境法律、監管動態及合規事宜。會議匯集多個部門的代表，強化以統一及負責任的方式管理環境事務。

與環境管理系統相關的建議融入綜合管理系統下的意識培訓中。所有新入職員工均須完成此項培訓，內容涵蓋我們的環境管理系統政策、目標及最佳實踐。其後的跟進測驗，以及對不合格個案的檢討，確保員工清晰理解環境管理系統的要求，並支持整個機構保持一致的合規水平。

我們的首席生產官擔任管理代表，全面負責環境管理的決策。該等決策以協作方式制定，各部門提出年度環境目標及實施計劃，並於第二次環境管理系統委員會會議上進行審議，其後由管理代表最終確定目標及相關計劃。委員會成員其後負責達成該等目標及監察進度，確保整個機構有效且協調地執行。

ENVIRONMENTAL EMERGENCY PREPAREDNESS AND RESPONSE

Emergency Preparedness

At Nissin Foods, we maintain clear Environmental Emergency Preparedness and Response guidelines to ensure our teams can respond quickly and effectively to operational incidents. The EMS Committee oversees regular drills and prepares summary reports for management review. Dedicated response teams are trained to manage potential emergencies, such as palm oil spills or chemical incidents, by following established protocols. After each event or drill, we conduct root-cause analysis, define preventive measures, and provide comprehensive reports to support informed decision-making.

Raw Material Handling

Recognising the essential role of palm oil in our products, we have established comprehensive procedures to prevent spillages across our operations. These include clear, carefully executed protocols for the safe transfer of palm oil from vendors' tanker trucks to our storage tanks. As part of strengthening these controls, Fujian Nissin has installed palm oil reduction equipment on its production line, enabling a 2.11% reduction in palm oil consumption while maintaining the same production volume. Together, these measures help ensure both responsible handling and more efficient use of this key resource.

Regular Inspection and Emergency Drills

During the year, we continued to strengthen environmental protection and occupational safety management through routine inspections and reviews conducted under our Environmental Management System (EMS). These inspections form an important part of our operational controls, enabling us to verify that daily activities remain aligned with our environmental objectives, internal procedures and applicable regulatory requirements. Regular monitoring also allows potential risks or operational deviations to be identified and addressed in a timely manner, thereby supporting continuous improvement in environmental and safety performance.

To enhance emergency preparedness, our Hong Kong production facilities implemented an emergency preparedness plan in 2025 that included 22 emergency drills covering a range of scenarios, such as evacuation procedures and chemical spill response. In addition to these drills conducted in Hong Kong, our other manufacturing facilities also organised multiple emergency response exercises throughout the year based on site-specific operational risks. These drills are designed to familiarise employees with emergency procedures, strengthen coordination among relevant teams and ensure that appropriate response measures can be implemented effectively in the event of an incident.

環境應急準備和回應

應急準備

在日清食品，我們設有清晰的環境應急準備與回應指引，確保團隊能夠迅速有效地應對營運事故。環境管理系統委員會監督定期演練，並擬備匯總報告供管理層審閱。專責應對團隊接受培訓，按照既定程序管理潛在緊急情況，例如棕櫚油洩漏或化學品事故。每次事件或演練後，我們均進行根本原因分析，制定預防措施，並提供全面報告以支持知情決策。

原材料處理

我們認識到棕櫚油在我們產品中的重要作用，已制定全面程序以防止營運中發生洩漏。該等程序包括清晰且嚴格執行的安全轉移指引，確保棕櫚油從供應商的油罐車安全轉移至我們的儲存罐。為加強相關管控，福建日清在生產線上安裝了棕櫚油減量設備，在維持相同產量的情況下，使棕櫚油消耗量減少2.11%。綜合而言，此等措施有助確保對這一關鍵資源的負責任處理及更高效利用。

定期檢查與應急演練

年內，我們透過環境管理系統下的常態化巡查與檢討，持續加強環境保護及職業安全管理。該等巡查是我們營運管控的重要組成部分，保證我們確認日常活動與環境目標、內部程序及適用監管規定相契合。定期監察亦有助及時識別及處理潛在風險或營運偏差，從而推動環境及安全表現持續改進。

為加強應急準備，我們的香港生產設施於2025年實施了應急準備計劃，當中包括22次涵蓋不同情景的應急演練，例如疏散程序及化學品洩漏應對。除香港進行的演練外，我們的其他生產設施亦於年內根據各屬地的營運風險，組織了多次應急響應演練。該等演練旨在讓員工熟悉應急程序，加強相關團隊之間的協調，並確保在發生事故時能夠有效實施適當的應對措施。

PACKAGING AND WASTE MANAGEMENT

Our Packaging Strategy

In response to increasing regulatory and public concerns over single-use packaging waste, we have intensified our efforts to reduce waste and enhance the sustainability of our packaging solutions. Our approach focuses on innovative measures that minimise environmental impact while optimising packaging performance. These initiatives are guided by our “Three Pillar Containers/Packaging Design Guiding Principles”, which remain the foundation of our long-term packaging strategy.

包裝與廢棄物管理

包裝策略

為應對監管機構及公眾對即棄包裝廢棄物日益增加的關注，我們加強了減少廢棄物及提升包裝方案可持續性的工作。我們的方針聚焦於創新措施，在優化包裝效能的同時，將環境影響降至最低。此等舉措以我們的「[容器/包裝設計指導原則的三項主軸]」為指引，該等原則是我們長期包裝策略的基石。

- We prioritise avoiding materials that may pose risks to human health or the environment. We also actively promote the use of lower impact alternatives, such as recycling paper.
- 避免使用可能對人體健康或環境構成風險的物料。同時，我們積極推廣使用影響較低的替代品，例如循環再用紙張。

- Reduce: We focus on minimising container weight and volume, as well as reducing the total number of packaging components used.
- Recycle: We actively incorporate recycled raw materials and prioritise the use of materials that are highly recyclable.
- 物盡其用：注重減輕容器重量及體積，同時減少使用的包裝組件總數。
- 循環再用：積極採用循環再用原材料，並優先選用具有高回收性的物料。

- Our container and packaging design process is guided by Life Cycle Assessment (LCA), ensuring we consider environmental impacts from raw material sourcing to end of life disposal. We also continuously explore innovative approaches to enhance our packaging, with a focus on using fewer resources and selecting higher quality, more sustainable materials.
- 容器及包裝設計流程以生命週期評估為指導，確保我們考慮從原材料採購到最終處置的整個生命週期中的環境影響。我們亦持續探索創新的包裝改進方法，重點關注使用更少資源，並選用更高品質、更可持續的物料。

Redesigning for Waste Reduction

Our Granola Production Department (GPD) undertook a significant redesign of the syrup room to change the syrup-mixing mode, reducing food waste.

Enhancing Packaging Efficiency

Our Demae Ramen Production Department (DRPD) has implemented measures to reduce film usage. With the installation of automatic stretch-film wrapping machines, we achieved approximately 27% reduction in stretch film per production pack. This initiative not only lowers material consumption but also contributes to overall waste reduction.

重新設計，減少浪費

我們的穀物麥片生產部對糖漿室進行了一次重大的重新設計，旨在改變糖漿混合模式，減少食物浪費。

提高包裝效率

我們的出前拉麵生產部已實施措施減少薄膜用量。透過安裝自動拉伸膜包裝機，我們每包產品的拉伸膜用量減少了約27%。此舉不僅降低了物料消耗，亦有助整體減少浪費。

OUR PLANET 我們的地球

Since 2009, Nissin Foods has undertaken a systematic transformation of its Cup Noodles packaging to reduce environmental impact. Beginning with the transition from Styrofoam to ECO CUP technology in Hong Kong and later the Chinese Mainland, achieving an 87.8% reduction in plastic use and a 24% decrease in CO₂ emissions per product. In 2021, we introduced an improved ECO CUP that enhanced space utilisation and further reduced plastic consumption by 12.8% and CO₂ emissions by 6.8%. This was followed by the removal of petroleum-based plastics from Regular and Big Size Cup Noodles lids in 2022 and 2023, reducing plastic usage by 33.8% and 34.3%, respectively. In 2024, we further advanced material sustainability by integrating biomass into a single Cup Noodles product. In 2025, we continued this transition by introducing the Easy-Peel Composite Cup for Demae Icho Regular Cup, enhancing the recyclability through the separation of the plastic container and paper outer packaging.

我們在ECO杯包裝中採用生物質材料

自2009年起，日清食品有系統地對合味道包裝進行改造，以減少環境影響。首先是香港(其後擴展至中國內地)將發泡膠杯轉為ECO杯技術，使每個產品的塑料用量減少87.8%，二氧化碳排放減少24%。2021年，我們推出改良版ECO杯，提升了空間利用率，並進一步減少塑料消耗12.8%及二氧化碳排放6.8%。其後於2022年及2023年，我們分別將常規及大杯裝合味道杯蓋中的石油基塑料移除，塑料用量分別減少33.8%及34.3%。2024年，我們將生物質材料融入一款合味道產品，進一步實現物料可持續性。2025年，我們繼續推進此項轉變，為出前一丁常規杯裝引入「易剝離組合杯」，透過將塑料容器與紙質外包装分離，提升可回收性。

Our Green Packaging Transformation

Phase 1: From Plastic Chips to ECO CUP (2009/2010)

The journey towards green packaging at Nissin Foods began with a significant shift in 2009/2010 in Hong Kong and Chinese Mainland, from petroleum-derived plastic to more environmentally friendly containers, known as the ECO Cup. The ECO Cup, primarily made of paper, emerged as a sustainable alternative to Styrofoam, embodying our ethos “for Ecology, for Customers, for Originality”. This transition not only addressed the issue of CO₂ emissions during production but also tackled the challenge of plastic decomposition in landfills. In Chinese Mainland, this switch led to a 24% reduction in CO₂ emissions and an 87.8% decrease in plastic usage per serving of Cup Noodles.

The design of the ECO Cup also played a crucial role in preserving ingredient quality and maintaining the quality of the noodles, demonstrating that environmental considerations need not compromise product excellence.

綠色包裝轉型

第一階段：自塑料片至ECO杯(2009/2010)

日清食品的綠色包裝之旅始於2009/2010年在香港及中國內地的一次重大轉變，即從石油塑膠容器轉變為更環保的容器-ECO杯。ECO杯主要由紙製成，是發泡膠的可持續替代品，體現日清「為了地球、為了顧客、為了原創」的環保理念。這一轉變不僅解決了生產過程中的二氧化碳排放問題，更是化解了塑膠在垃圾堆填區難以分解這一挑戰。這一轉變使中國內地每份合味道的二氧化碳排放量以及塑膠用量分別減少24%及87.8%。

ECO杯的設計還在保持原料品質及維持麵條品質方面發揮重要作用，切實證明環境因素不一定會影響產品卓越性。

Phase 2: ECO CUP Renewable (2021)

In 2021, to celebrate the 50th anniversary of Cup Noodles, we introduced an upgraded Cup Noodles product in a redesigned ECO Cup. The revamped container not only improved space utilisation and noodle quality but also further reduced CO₂ emissions and plastic use by 6.8% and 12.8% respectively, compared to its predecessor.

The cumulative impact of these initiatives resulted in a 29.16% reduction in CO₂ emissions from our cup containers. Moreover, the downsizing of the container also led to a significant reduction in paper usage and CO₂ emissions related to cardboard and transportation, improving our overall environmental impact.

Phase 3: Less Plastic in ECO CUP Lid – Regular Size Cup Noodles (2022)

In fulfilment of our ongoing commitment to decreasing the use of plastic, we upgraded the ECO Cup lid in 2022 by removing a plastic layer from its upper surface. We continuously made our effort to reduce the plastic usage this year. As the result, this innovation reduced our plastic use in cup lid by 33.8%, marking another milestone in our sustainable packaging journey.

Phase 4: Further CUP Lid Plastic Reduction – Big Size Cup Noodles (2023)

While the Regular Size Cup Noodles were the first to come with a reduced plastic cup lid in 2022, we expanded our redesign to the Big Size Cup Noodle in 2023, applying the latest advancements in lid design to further reduce plastic usage. The redesign of the Big Size Cup Noodle yielded a 34.3% reduction in plastic use in cup lid. Moving forward, we will continue our efforts to refine and improve our packaging solutions, striving to balance product quality with environmental responsibility.

Phase 5: Biomass PE – Seafood Flavour Cup Noodles (2024)

In 2024, we have taken our sustainability efforts to the next level by introducing biomass polyethylene (PE) in the production of packaging material for our seafood flavour Cup Noodles. This innovative material, which incorporates plant-derived renewable materials from sugarcane bagasse, has resulted in a reduction of 3.78 tons of greenhouse gas emissions in 2024. We aim to further expand the use of biomass-based packaging materials in the future. By using this eco-friendly material, Nissin Foods not only reduces greenhouse gas emissions from packaging production but also transforms waste material (sugarcane bagasse) into a valuable resource.

Currently, this sustainable packaging is used exclusively for our seafood flavour Cup Noodles. However, given its significant environmental benefits, we are exploring the possibility of expanding its use to other varieties and flavours of Cup Noodles in the future.

第二階段：ECO杯革新(2021)

2021年，為慶祝合味道誕生50週年，我們以重新設計的ECO杯推出生級版合味道產品。改良後的容器不僅提高空間利用率及麵條品質，相較上代產品，亦進一步減少二氧化碳排放量及塑膠用量分別為6.8%及12.8%。

藉助上述措施的累積效應，我們杯型容器的二氧化碳排放量減少了29.16%。此外，容器小型化亦大大減少紙張用量以及與紙板和運輸有關的二氧化碳排放量，從而改善我們對環境的整體影響。

第三階段：ECO杯杯蓋減少塑膠物料 – 常規尺寸合味道(2022)

為履行我們對減少塑膠使用的承諾，我們於2022年對ECO杯杯蓋進行升級，移除ECO杯杯蓋頂層的塑料層。我們於本年度持續努力將塑膠使用量減少。因此，這一創新將杯蓋塑膠使用量減少33.8%，是我們可持續包裝歷程中又一里程碑。

第四階段：進一步減少杯蓋中的塑膠物料 – 合味道大杯麵(2023)

隨著我們先於2022年對常規尺寸合味道採用減少塑膠物料的杯蓋，其後於2023年將重新設計的範圍擴大至合味道大杯麵，採用最新的杯蓋設計，進一步減少塑膠用量。合味道大杯麵的重新設計減少34.3%杯蓋塑膠使用量。未來，我們將繼續努力完善及改進包裝解決方案，致力在產品品質和環保責任之間達致平衡。

第五階段：生物質聚乙烯 – 海鮮風味合味道(2024)

2024年，我們於海鮮味合味道包裝材料的生產中引入生物質聚乙烯，將我們的可持續發展工作提升至新水平。這種創新材料採用從甘蔗渣衍生的植物可再生物料，於2024年減少3.78噸溫室氣體排放。我們旨在未來進一步擴大生物質包裝材料的使用。透過使用這種環保材料，日清食品不僅減少包裝生產過程中的溫室氣體排放，亦將廢棄材料(甘蔗渣)轉化為寶貴資源。

目前，這種可持續包裝專門用於我們的海鮮味合味道。然而，考慮到其顯著環境效益，我們正探索未來將其用途擴展至其他品種及口味的合味道的可能性。

Phase 6: Easy-Peel Composite Cup – Demae Iccho Cup Noodles (2025)

In 2011, we upgraded our Composite Cup to reduce plastic usage by more than 50% compared with the original design. This year, we introduced an Easy-Peel Composite Cup featuring a guided tear line on the sleeve, enabling the easy separation of the plastic container and paper outer layer for proper disposal. This enhancement significantly improves recyclability, with both the paper packaging and plastic container being 100% recyclable. It is currently used for our Sesame Oil Flavour Demae Iccho Regular Cup.

第六階段：易剝離組合杯 - 出前一丁杯麵(2025)

於2011年，我們改良了組合杯，較原有設計減少超過50%的塑料用量。本年度，我們推出「易剝離組合杯」，杯身設有導向撕開線，可輕鬆將塑料容器與紙質外層分開，便於正確棄置。此項改進顯著提升了可回收性，實現紙質包裝與塑料容器的100%可回收。目前此設計應用於我們的麻油味出前一丁常規杯裝。

Waste Management

We uphold strong environmental standards through a rigorous waste management system that ensures all hazardous and non-hazardous waste is properly collected and disposed of by certified contractors. Our manufacturing activities primarily generate solid waste and wastewater, and we have developed Good Practice Guidelines to help employees correctly classify waste and handle hazardous waste safely.

廢棄物管理

我們透過嚴謹的廢棄物管理系統，堅守高標準的環境要求，確保所有有害及無害廢棄物均由合資格承辦商妥善收集及處置。我們的生產活動主要產生固體廢棄物及廢水，為此我們制定了《良好操作指引》，協助員工正確分類廢棄物及安全處理有害廢棄物。

In Hong Kong, where food waste remains a significant environmental issue, we continue to reduce waste at the source. Our raw material sharing system improves resource utilisation by reallocating ingredients across operations, minimising unnecessary disposal. We also participate in the Hong Kong Government’s “Food Waste/Sewage Sludge Anaerobic Co-Digestion Trial Scheme,” which converts food waste into compost and biogas, helping to lower greenhouse gas emissions from landfills.

在香港，廚餘問題仍然是重大的環境議題，我們持續從源頭減少廢棄物。我們的原材料共享系統透過跨營運環節調配食材，改善資源利用，減少不必要的棄置。我們亦參與香港政府的「廚餘、污泥共厭氧消化試驗計劃」，將廚餘轉化為堆肥及沼氣，有助減少堆填場的溫室氣體排放。

Beyond reduction initiatives, we turn noodle waste from our production lines into animal feed, and our electronic waste is collected by the Environmental Protection Department’s authorised recyclers to ensure proper treatment and recovery.

除減量措施外，我們將生產線上的麵條廢料轉化為動物飼料，而電子廢棄物則由環境保護署認可的回收商收集，確保妥善處理及回收。

Hazardous Waste Management

Nissin Fujian has installed specialised laboratory equipment to efficiently clean and handle test containers, thereby reducing hazardous waste generation. Following the installation of the equipment, hazardous waste generation is expected to be reduced by approximately 50% annually compared with non-adoption.

有害廢棄物管理

日清福建安裝了專門的實驗室設備，以高效清潔及處理測試容器，從而減少有害廢棄物的產生。設備安裝後，預計有害廢棄物產生量與未採用該設備時相比將每年減少約50%。

WATER MANAGEMENT

At Nissin Foods, we recognise the critical role of water in both our production processes and the ecosystems in which we operate. Efficient water use and minimising our impact on local water systems remain key priorities. Our approach underscores the importance of responsible water management for sustainable operations, particularly in the food industry.

Water Consumption and Efficiency

In 2025, we recorded a total water consumption of 558,852 cubic metres (468,827 cubic metres in 2024). The increase in water consumption is largely driven by the expansion of our reporting boundary.

To support more efficient water management, we have installed steam circulation systems to improve steam utilisation, and the hot water generated from steaming processes is reused in employee shower rooms. In addition, automatic taps have been fitted across our sanitary facilities to help regulate consumption without compromising hygiene.

CLIMATE CHANGE MANAGEMENT

By adopting the four-pillar framework – Governance, Strategy, Risk Management, and Metrics and Targets – we provide stakeholders with clearer insights into our climate actions and the potential impacts on our operations.

Governance

The Board has direct oversight of climate-related risks and opportunities, ensuring climate considerations are embedded in Company-level decision-making at the highest level.

The Board delegates climate-related risk and opportunity management to our Senior Management. Led by the Chief Executive Officer, the Management Committee, which includes Executive Directors and senior business leaders, actively evaluates Nissin Foods' ESG performance, with a focus on climate matters. The Management Committee provides the Board with annual updates on major sustainability and climate-related developments.

To embed climate risk considerations into our enterprise risk assessments, ESG and climate-related risk management processes are carried out by the heads and managers of each business unit. They are responsible for implementing mitigation plans that address the risks relevant to their operations.

To stay at the forefront of climate governance, Nissin Foods ensures that senior management and the Board remain up to date on the latest ESG and climate-related developments. We arrange regular training sessions for the Board, including briefings on emerging climate disclosure requirements. These initiatives equip our leadership with the knowledge and skills needed to navigate the evolving climate governance landscape.

水資源管理

在日清食品，我們深知水在生產流程及我們營運所處的生態系統中均扮演著關鍵角色。高效用水及減低對當地水系統的影響，依然是我們的重點優先事項。我們的方針強調，負責任的水資源管理對實現可持續營運至關重要，尤其是在食品行業。

用水量與效率

於2025年，我們的總用水量為558,852立方米(2024年為468,827立方米)。用水量增加主要源於報告範圍的擴大。

為支持更高效的水資源管理，我們安裝了蒸汽循環系統以提升蒸汽利用率，並將蒸煮過程產生的熱水回用至員工淋浴間。此外，我們在衛生設施中安裝了自動水龍頭，有助在維持衛生的同時調節用水量。

氣候變化管理

透過採納管治、策略、風險管理，以及指標與目標四大支柱框架，我們為持份者提供更清晰的資訊，以了解我們的氣候行動及其對營運的潛在影響。

管治

董事會直接監督氣候相關風險與機遇，確保氣候考量融入公司最高層級的決策之中。

董事會將氣候相關風險與機遇的管理職責授予高級管理層。由首席執行官領導的管理委員會，成員包括執行董事及高級業務領導，積極評估日清食品的環境、社會及管治表現，並重點關注氣候事宜。管理委員會每年向董事會匯報可持續發展及氣候相關的主要發展動態。

為將氣候風險考量融入企業風險評估，環境、社會及管治與氣候相關的風險管理流程由各業務單位負責人及經理執行，由彼等負責實施減緩計劃，以應對與其營運相關的風險。

為保持在氣候管治領域的前沿地位，日清食品確保高級管理層及董事會掌握環境、社會及管治與氣候相關的最新發展動態。我們為董事會安排定期培訓，包括新興氣候披露要求的簡介。此等措施讓我們的領導層具備所需知識及技能，以應對不斷演變的氣候管治格局。

Strategy

In line with HKEX's climate-related disclosure guidelines, we adopted two climate scenarios for analysis last year. The Turquoise scenario reflects a sharp decline in global emissions, with temperature increases kept well below 1.5°C to 2°C by 2100, while the Brown scenario indicates an increasing emissions trend and a global average temperature increase exceeding 3°C by 2100. The climate scenario analysis covered our key operations in Hong Kong and the Chinese Mainland.

Using these scenarios and publicly available pathways, we evaluated potential climate impacts on Nissin Foods' operations and conducted detailed city-level analyses for key asset locations in Hong Kong, Chinese Mainland, and oversea regions.

Climate-related Risks

Climate risks fall into two categories: physical and transition risks. Physical risks stem from the direct impacts of climate change and can be acute or chronic. Transition risks arise from the shift toward a low-carbon economy. These include evolving policies and regulations, market and technological changes, and reputational considerations.

As decarbonisation accelerates, organisations may face stranded assets, unexpected costs, regulatory pressures, or increased market volatility. Together, these risks underscore the need for proactive planning to safeguard long-term business resilience.

策略

根據聯交所的氣候披露指引，我們於去年採用了兩種氣候情景進行分析。「綠松石情景」反映全球排放量急劇下降，至2100年將溫度升幅控制在遠低於1.5°C至2°C的水平；而「棕色情景」則顯示排放量呈上升趨勢，至2100年全球平均溫度升幅超過3°C。氣候情景分析涵蓋了我們在香港及中國內地的主要營運據點。

運用該等情景及公開可用的路徑，我們評估氣候變化對日清食品營運的潛在影響，並對香港、中國內地及海外地區的主要資產所在地進行詳細的城市層面分析。

氣候相關風險

氣候風險分為兩類：物理風險與轉型風險。物理風險源於氣候變化的直接影響，可分為急性或慢性。轉型風險則源於向低碳經濟轉型的過程，包括不斷演變的政策與法規、市場與技術變化，以及聲譽考量。

隨著脫碳步伐加快，企業可能面臨擱淺資產、預期外成本、監管壓力或市場波動加劇等挑戰。綜合而言，該等風險凸顯了主動規劃對於保障業務長遠韌性的必要性。

OUR PLANET 我們的地球

The climate-related risks that are potentially material to our business and value chain are summarised below.

Concentration of Climate-related Risks and Opportunities

Climate-related risks and opportunities may arise across different parts of the Group's business model and value chain. In particular, physical climate risks may affect the Group's manufacturing facilities and logistics operations through extreme weather events, changes in temperature patterns and potential disruptions to utilities or transportation infrastructure. These risks are most relevant to production facilities and distribution networks located in regions where the Group operates, including Hong Kong, the Chinese Mainland and other overseas markets.

Climate-related transition risks and opportunities may influence the Group's procurement practices, packaging materials, energy sourcing and operational efficiency. At the same time, opportunities may emerge through improvements in energy efficiency, adoption of renewable energy and innovation in product development and packaging design.

Changes to Business Model and Resource Allocation

The Group continues to review its operational practices and resource allocation to address climate-related risks and opportunities. Current initiatives primarily focus on improving energy efficiency in manufacturing processes, increasing the use of renewable energy where feasible, and enhancing environmental management practices across production facilities. Investments in energy-saving equipment, operational optimisation and solar power generation form part of these efforts.

At present, these initiatives are implemented as part of Nissin Foods' broader environmental management and operational efficiency programmes. The Group will continue to evaluate potential adjustments to its business model and resource allocation in response to evolving climate-related risks, regulatory developments and stakeholder expectations.

Climate Transition Plan

As at the reporting date, the Group has not yet established a formal climate-related transition plan. Nevertheless, the Group has implemented a number of environmental management initiatives, including energy efficiency improvements and the gradual expansion of renewable energy use in certain operations. The Group will continue to monitor regulatory developments and market practices relating to climate transition planning and will consider developing a more structured transition roadmap in the future as appropriate.

Resourcing of Climate-related Initiatives

Climate-related initiatives within the Group are primarily supported through existing operational budgets and capital investments related to environmental management and energy efficiency. Relevant departments are responsible for implementing and monitoring these initiatives.

The Group plans to continue allocating resources to activities that improve energy performance, optimise resource use and support environmental compliance. Future investments will be assessed in line with operational needs, technological feasibility and financial considerations.

氣候相關風險與機遇的集中程度

氣候相關風險與機遇可能出現於本集團業務模式及價值鏈的不同環節。其中，物理氣候風險可能透過極端天氣事件、溫度模式變化，以及公用設施或交通運輸基礎設施可能出現的中斷，對本集團的生產設施及物流運作構成影響。該等風險與本集團營運所在地區（包括香港、中國內地及其他海外市場）的生產設施及分銷網絡最為相關。

氣候相關轉型風險與機遇可能影響本集團的採購實踐、包裝材料、能源獲取及營運效率。與此同時，機遇亦可在提升能源效益、採用可再生能源以及產品開發與包裝設計創新的過程中湧現。

業務模式與資源配置的調整

本集團持續檢視營運實踐及資源配置，以應對氣候相關風險與機遇。目前的舉措主要集中在提升生產流程的能源效益、在可行情況下增加可再生能源的使用，以及加強各生產設施的環境管理實踐。節能設備、營運優化及太陽能發電等方面的投資，均屬於此等工作的一部分。

目前，此等舉措作為日清食品整體環境管理及營運效益計劃的一部分予以實施。本集團將繼續評估業務模式及資源配置的潛在調整，以回應不斷演變的氣候相關風險、監管動態及持份者期望。

氣候轉型計劃

截至報告日期，本集團尚未制定正式的氣候相關轉型計劃。儘管如此，本集團已實施多項環境管理舉措，包括能源效益提升及在部分營運設施中逐步擴大可再生能源的使用。本集團將繼續監察與氣候轉型規劃相關的監管動態及市場實踐，並將在未來適時考慮制定更為系統化的轉型路線圖。

氣候相關舉措的資源配置

本集團內的氣候相關舉措主要透過與環境管理及能源效益相關的現有營運預算及資本投資提供支持。相關部門負責執行及監察此等舉措。

本集團計劃持續配置資源，以推動提升能源表現、優化資源使用及支持環境合規的相關工作。未來的投資將根據營運需求、技術可行性及財務考量進行評估。

Progress of Previously Disclosed Plans

The Group continues to implement environmental and energy management initiatives disclosed in previous reporting periods. During the reporting year, progress was made in improving operational energy efficiency and expanding renewable energy generation through the installation and operation of solar panel systems at certain production facilities. These initiatives contribute to the Group's ongoing efforts to reduce operational energy consumption and associated GHG emissions.

Impact of Climate-related Risks and Opportunities on Financial Performance

During the reporting period, the Group considered the potential effects of climate-related risks and opportunities on its financial position, financial performance and cash flows. At present, we are working on quantifying the current and anticipated financial effects of climate-related risks and opportunities. The Group will continue to monitor potential financial implications arising from climate-related risks and opportunities as part of its broader risk management and strategic planning processes.

Risk of Material Adjustments to Assets and Liabilities

Based on the Group's current assessment, no climate-related risks or opportunities have been identified that are expected to result in a significant risk of material adjustment to the carrying amounts of assets or liabilities in the next reporting period.

Expected Financial Implications Over Time

Looking ahead, the Group expects that its strategy to address climate-related risks and opportunities may involve continued investment in energy efficiency improvements, operational optimisation and environmental management initiatives. These investments may support long-term cost efficiency, regulatory compliance and operational resilience.

Funding for such initiatives is expected to be sourced primarily from the Group's internal financial resources and capital expenditure budgets. At this stage, the Group does not anticipate significant changes to its financial performance or cash flows in the short term arising specifically from climate-related initiatives. Over the medium to long term, improvements in energy efficiency and operational practices may contribute to enhanced resource efficiency and cost management.

Climate Resilience

The Group has conducted a qualitative assessment of climate-related risks and opportunities to better understand the potential implications of climate change for its operations and strategy. This assessment considered both physical risks, such as extreme weather events that could affect manufacturing facilities or logistics networks, and transition risks arising from regulatory changes, evolving market expectations and technological developments.

Based on the assessment, climate-related risks are not expected to materially alter the Group's overall business model in the near term. However, the Group recognises that uncertainties remain regarding the pace of climate change, regulatory developments and technological transitions. As such, the Group will continue to monitor relevant developments and consider potential adaptation measures where necessary.

過往披露計劃的進展

本集團持續推行過往報告期間所披露的環境及能源管理舉措。於報告年度內，我們在提升營運能源效益，以及透過在部分生產設施安裝及運作太陽能板系統以擴大可再生能源發電方面均取得進展。該等舉措有助本集團持續減少營運能源消耗及相關溫室氣體排放。

氣候相關風險與機遇對財務表現的影響

於報告期內，本集團考慮了氣候相關風險與機遇對其財務狀況、財務表現及現金流量的潛在影響。目前，我們努力探索的方向為量化氣候相關風險與機遇所帶來的當前及預期財務影響。本集團將持續監察氣候相關風險與機遇可能引致的財務影響，將此長效化為整體風險管理及策略規劃流程的一部分。

資產與負債重大調整的風險

根據本集團目前的評估，尚未識別出任何氣候相關風險或機遇，預期會導致下一個報告期內資產或負債賬面值出現重大調整的重大風險。

長遠預期財務影響

展望未來，本集團預期其應對氣候相關風險與機遇的策略，可能涉及持續投資於能源效益提升、營運優化及環境管理舉措。該等投資或有助實現長遠成本效益、監管合規及營運韌性。

此類舉措的資金預計主要來自本集團的內部財務資源及資本開支預算。現階段，本集團預計短期內財務表現或現金流量不會因氣候相關舉措而出現重大變化。中長期而言，能源效益及營運實踐的改善或有助提升資源效益及成本管理。

氣候韌性

本集團已對氣候相關風險與機遇進行定性評估，以更全面了解氣候變化對其營運及策略的潛在影響。是次評估同時考慮了物理風險(例如可能影響生產設施或物流網絡的極端天氣事件)以及因監管變化、市場期望演變及技術發展而產生的轉型風險。

根據評估，氣候相關風險預期在短期內不會引發本集團整體業務模式的重大改變。然而，本集團意識到，氣候變化的速度、監管動態及技術轉型仍存在不確定性。因此，本集團將繼續監察相關動態，並在必要時考慮採取適當的適應措施。

OUR PLANET 我們的地球

The Group's capacity to respond to climate-related challenges is supported by its ongoing efforts to improve operational efficiency, strengthen environmental management systems and enhance risk monitoring processes. These measures provide a foundation for adapting the Group's strategy and operations over the short, medium and long term as climate-related conditions evolve.

Risk Management

Climate-related risk management forms part of Nissin Foods' broader enterprise risk management approach. Potential climate-related risks and opportunities are identified, assessed and monitored alongside other strategic and operational risks. Relevant departments periodically review trends, regulatory developments and market expectations that may affect the Group's operations, supply chain and facilities.

Key Inputs

The Group identifies potential climate-related risks and opportunities by gathering inputs from internal management teams, operational personnel and publicly available sources on climate trends and regulatory developments. In this process, we consider factors such as evolving climate regulations, changes in energy markets, supply chain disruptions, and shifting stakeholder expectations regarding sustainability. These inputs help the Group develop an initial understanding of climate-related risks and opportunities that may affect its operations and value chain.

Climate Scenario Analysis

To enhance our understanding of potential future developments, we reference publicly available climate scenarios to consider a range of possible climate-related pathways. This helps provide a broader perspective on how physical and transition risks may evolve over time and supports internal discussions on potential long-term implications for the business.

Risk Assessment

Following identification, potential climate-related risks and opportunities are qualitatively assessed by considering their nature, likelihood and possible operational or financial implications. Refer to section Climate-related Risks for more detail.

Risk Prioritisation and Monitoring

Identified climate-related risks and opportunities are evaluated and prioritised in the context of the Group's overall risk management framework. The Group continues to monitor climate-related risks and opportunities through periodic reviews of regulatory developments, market trends and operational conditions. Ongoing monitoring will support the timely identification of emerging risks and helps inform our risk management and business planning processes.

本集團應對氣候相關挑戰的能力有賴其對於提升營運效率、強化環境管理體系及加強風險監察流程的持續投入。在氣候相關狀況不斷演變的背景之下，該等措施為本集團在短期、中期及長期調整策略與營運奠定了基礎。

風險管理

氣候相關風險管理是日清食品整體企業風險管理方針的組成部分。潛在的氣候相關風險與機遇，與其他策略及營運風險一併進行識別、評估及監察。相關部門定期檢視可能影響本集團營運、供應鏈及設施的趨勢、監管動態及市場期望。

關鍵輸入數據

Metrics and Targets

Nissin Foods recognises that clearly defined climate-related metrics and targets are critical for monitoring environmental performance, managing climate-related risks, and aligning the Group's strategy with evolving regulatory expectations and global sustainability trends. The Group continues to strengthen its data collection and analytical capabilities as part of ongoing efforts to improve transparency and accountability.

Greenhouse Gas Inventory and Metrics

GHG emissions are measured in accordance with the GHG Protocol, using the operational control approach to account for emissions from operations over which the Group has full management authority. For the current reporting year, the GHG inventory covers twelve representative plants. Emissions are reported in absolute terms (tCO₂e) and complemented by intensity indicators to provide a clearer understanding of operational performance relative to production activities.

Key assumptions underlying the GHG calculation include the use of emission factors sourced from recognised authorities such as government agencies and internationally accepted databases, as well as activity data derived from operational records. Where data gaps exist, conservative estimation methods are applied to ensure completeness and reliability of the inventory. The Group continues to refine its data collection and calculation methodology to improve accuracy and consistency over time.

The Group is actively evaluating additional climate-related metrics, including the assessment of assets and operations that may be exposed to physical or transition-related climate risks, as well as the identification of potential opportunities to reduce emissions and improve operational efficiency. While no internal carbon pricing mechanism is currently applied to investment decisions, the Group is monitoring regulatory developments and emerging global practices to inform potential future adoption.

Targets and Performance Management

We are in the process of evaluating the feasibility, business implications, and appropriate scope of setting quantitative GHG reduction targets. In the interim, the Group monitors operational emissions through regular reporting and analysis, providing insights that support risk management and strategic planning. These metrics serve as a foundation for future target-setting, enabling informed decision-making once formal targets are established.

Capital Allocation and Remuneration Incentives

The Group is also assessing the amount and proportion of capital expenditure, financing, and investments that are directed toward initiatives addressing climate-related risks and opportunities. These efforts aim to support the gradual integration of climate considerations into business planning, while ensuring alignment with long-term sustainability objectives.

At present, Nissin Foods does not link climate-related performance to executive or employee remuneration. The Group continues to explore potential approaches to align incentive structures with environmental performance in a manner consistent with its evolving climate strategy.

Use of Carbon Credits

Nissin Foods currently does not employ carbon credits or offset mechanisms as part of its emissions management strategy. We will continue to monitor developments in voluntary and compliance carbon markets to assess future applicability.

指標與目標

日清食品認識到，清晰明確的氣候相關指標與目標對於監察環境表現、管理氣候相關風險以及保持本集團策略與不斷演變的監管期望及全球可持續發展趨勢的一致性至關重要。本集團持續加強數據收集及分析能力，為提升透明度及問責性持續作出貢獻。

溫室氣體排放清單與指標

溫室氣體排放按照《溫室氣體議定書》進行計量，採用營運控制權法核算本集團擁有全面管理權限的營運所產生的排放。於本報告年度，溫室氣體排放清單涵蓋十二間代表性工廠。排放量以絕對值(噸二氧化碳當量)呈報，並輔以密度指標，以便更清晰地了解與生產活動有關的營運表現。

溫室氣體計算的主要假設包括使用來自政府機構等權威部門及國際認可數據庫的排放因子，以及源自營運記錄的活動數據。如存在數據缺口，則採用保守估算方法，以確保排放清單的完整性及可靠性。本集團持續優化數據收集及計算方法，以提升長遠的準確性及一致性。

本集團正積極評估其他氣候相關指標，包括對可能面臨物理或轉型氣候風險的資產與業務進行評估，以及識別減少排放及提升營運效率的潛在機遇。雖然目前尚未在投資決策中應用內部碳定價機制，但本集團正密切關注監管動態及新興的全球實踐，為日後可能採納相關機制提供參考。

目標與績效管理

我們正在評估設定量化溫室氣體減排目標之可行性、業務影響及適當範圍。在此期間，本集團透過定期呈報及分析監察營運排放，為風險管理及戰略規劃提供參考依據。該等指標為日後制定目標奠定基礎，確保在正式確立目標時能夠作出有依據的決策。

資本配置與薪酬激勵

本集團亦正評估用於應對氣候相關風險與機遇的資本開支、融資及投資的金額與比例。此等措施旨在推動氣候考量逐步融入業務規劃，同時確保與長遠可持續發展目標保持一致。

目前，日清食品並未將氣候相關表現與管理層或員工薪酬掛鉤。本集團將持續探索可行方式，在遵循不斷演變的氣候策略方向的前提下實現激勵機制與環境表現的互相銜接。

碳信用的使用

日清食品目前並未將碳信用或抵銷機制納入其排放管理策略。我們將繼續監察自願碳市場及合規碳市場的發展，以評估未來的適用性。

Our focus on safety continues through to finished products, which undergo comprehensive testing for genetically modified organisms, preservatives, and allergens to ensure they meet the highest standards of safety and quality for our consumers.

Pre-Delivery Inspections

Before reaching customers, every product undergoes stringent pre-shipment inspections. These include microbiological testing, weight verification, visual checks, and sensory reviews, all carried out by qualified specialists to ensure consistent quality and safety.

Third Party Certification

Our strong focus on food safety and quality is reflected in the certifications held across all our manufacturing facilities. Every food production site is accredited to FSSC 22000 (Food Safety System Certification) or SQF Edition 9 (Safe Quality Food, Food Safety Code: Food Manufacturing Edition 9) standards. In addition, all sites operate under the Hazard Analysis and Critical Control Points (HACCP) framework, which systematically identifies and controls food safety risks to ensure the production of safe and high-quality products.

Technical Support on Food Safety

The Food Safety Evaluation and Research Institute Co., Ltd. (the "Institute"), in which we hold a 5% stake, provides essential technical support across our quality inspection processes. Accredited to ISO/IEC 17025 by the China National Accreditation Service or Conformity Assessment, the Institute supports testing and calibration activities throughout every production stage, from raw materials to finished products.

我們致力在產品開發及供應鏈中貫徹卓越的質量、安全與可持續發展標準。這包括我們嚴謹的食品安全及質量標準、提升產品營養價值的舉措、強化價值鏈各環節的流程，以及持續聚焦負責任採購。

食品安全及質量

產品安全及質量是我們業務的基石。我們透過檢測與認證、先進技術、嚴謹的供應鏈監督，以及具環境責任的實踐，堅守該等標準。我們的重點始終是為顧客提供不僅美味且安全及最高品質的產品。

食品安全管理

原材料與成品檢測

我們設有嚴格的核查程序，包括隨機檢測，以確保原材料不含農藥、重金屬及環氧乙烷等有害物質。我們亦因應新出現的警報或爆發通知進行針對性檢查，以及時處理潛在污染物。我們對安全的關注貫徹至製成品，對其進行基因改造生物、防腐劑及致敏原的全面檢測，確保為消費者提供符合最高安全及質量標準的產品。

交付前檢測

在送達顧客手中之前，每件產品均須經過嚴格的出貨前檢測。檢測項目包括微生物測試、重量核實、外觀檢查及感官評審，全部由合資格專業人員執行，以確保質量與安全的一致性。

第三方認證

我們對食品安全及質量的高度重視，體現於所有生產設施所持有的認證之中。每個食品生產基地均獲得FSSC 22000(食品安全體系認證)或SQF第九版(安全質量食品，食品安全規範：食品製造第九版)標準的認證。此外，所有廠房均在危害分析與關鍵控制點(HACCP)框架下運作，該框架系統性地識別及控制食品安全風險，以確保生產安全優質的產品。

食品安全技術支持

我們持有5%股權的日清(上海)食品安全研究開發有限公司(簡稱「食安研」)，為我們的質量檢測流程提供重要的技術支持。食安研獲中國合格評定國家認可委員會頒發ISO/IEC 17025認證，支持從原材料到製成品的每個生產階段的檢測及校準活動。

OUR PRODUCT 我們的產品

Annual Assessment

Our annual review includes a comprehensive assessment of the operations and processes of our plants and suppliers, covering audits, inspection protocols, product-recall procedures, compliance with food safety standards, and staff training. We are pleased to report that in 2025, no food safety or health-related complaints or product recalls were recorded.

Food Safety Policy and Training

We adhere to the FSSC 22000/SQF Edition 9 standards, and our Food Safety Policy provides a clear framework for goal setting, communication, and implementation across all food production sites. Following the revision of our Management Manual and Food Safety Policy to align with the updated FSSC 22000 requirements, we are confident that these enhancements strengthen our food safety culture across all employee groups, from office staff to production teams. To reinforce this, we delivered comprehensive training on quality and safety culture, ensuring our people are equipped to identify, prevent, and address food safety issues.

Effective communication remains essential to embedding our policy across the organisation. We prioritise clear internal and external communication, timely corrections, and continuous improvement to meet customer expectations. We also maintain comprehensive assessments of all raw materials to ensure full compliance with local and export regulations, as well as customer-specific food safety requirements.

The “Weekly Food Safety News” ensures employees stay informed about the latest industry standards and regulations, helping them remain aware of and prepared for evolving food safety requirements.

Product Recall Procedures

To strengthen our readiness and ensure the effectiveness of our recall procedures, we continue to conduct regular product recall drills across all food manufacturing sites. As part of this effort, all food production factories in Hong Kong, Chinese Mainland, and oversea regions conducted at least one product recall drill in 2025. In Hong Kong, we simulated a scenario in which incorrect packaging film was used for an export product. The drill was completed within our target timeframe of 4 hours, during which all affected products were identified and confirmed not to have been released to the market. These exercises help validate the robustness of our traceability systems and enhance our teams’ ability to respond swiftly and effectively to potential food safety risks.

Product Recall Management

Our product recall procedure is clearly structured, with recalls classified by risk level and supported by comprehensive traceability records. We maintain detailed customer complaint logs and have a dedicated, cross-functional Product Recall Team to manage the process. When a recall is required, we promptly communicate with distributors, regulators, and consumers through multiple channels. We also apply strict control measures to recalled products and conduct annual recall drills to ensure the effectiveness of our procedures.

年度評估

我們的年度審查包括對廠房及供應商營運與流程的全面評估，涵蓋審核、檢測程序、產品召回流程、食品安全標準合規情況，以及員工培訓。我們欣然報告，於2025年，並無接獲任何與食品安全或健康相關的投訴，亦無任何產品召回記錄。

食品安全政策與培訓

我們遵循FSSC 22000/SQF第九版標準，而我們的《食品安全政策》為所有食品生產基地的目標設定、溝通及執行提供了清晰框架。我們的管理手冊及食品安全政策已進行修訂，以符合更新後的FSSC 22000要求，我們有信心此等改進能強化從辦公室員工到生產團隊等各級員工的食品安全文化。為加強此理念，我們提供了全面的質量與安全文化培訓，確保員工能夠識別、預防及處理食品安全問題。

有效的溝通對於將政策融入整個機構仍然至關重要。我們重視清晰的內部及外部溝通、適時的糾正措施以及持續改進，以滿足顧客期望。我們亦對所有原材料進行全面評估，以確保完全符合本地及出口法規，以及客戶特定的食品安全要求。

《食品安全週報》確保員工掌握最新的行業標準及法規，助其了解不斷演變的食品安全要求並為此做好準備。

產品召回程序

為加強應變準備及確保召回程序的有效性，我們持續在所有食品生產基地進行定期產品召回演練。作為此項工作的一部分，香港、中國內地及海外地區的所有食品生產工廠均於2025年進行了至少一次產品召回演練。在香港，我們模擬了出口產品誤用錯誤包裝膜的情景。演練在我們預設的4小時目標時間內完成，期間所有受影響產品均被識別，並確認未有流入市場。該等演練有助驗證我們追溯系統的穩健性，並提升團隊迅速有效應對潛在食品安全風險的能力。

產品召回管理

我們的產品召回程序結構清晰，按風險等級對召回進行分類，並以全面的追溯記錄作為支持。我們備有詳細的客戶投訴記錄，並設有專責的跨部門產品召回團隊負責管理相關流程。當需要進行召回時，我們會透過多個渠道與分銷商、監管機構及消費者及時溝通。我們亦對召回產品實施嚴格管控措施，並每年進行召回演練，以確保程序的有效性。

OUR PRODUCT 我們的產品

Quality Assurance System

Established in 2005, the Institute has been central to advancing our quality assurance processes. It was created to strengthen our system by conducting local inspections of raw materials in China and to ensure the use of safe ingredients. Since then, it has remained a key component of the Group's quality assurance strategy, continually enhancing the safety and quality of our products.

Integrating Advanced International Testing Technologies

To strengthen our quality assurance system, the Institute has incorporated advanced food testing and analytical technologies from the Global Food Safety Institute, a unit of Nissin Foods Holdings Co., Ltd. ("Nissin Japan"). This integration has significantly improved our capability to inspect and analyse raw materials, including wheat flour, dried vegetables, meat, and seafood, as well as instant noodle products supplied to Nissin Japan and the Group's companies in China.

Our testing programme covers a wide range of checks to ensure product safety and quality, including assessments for pesticide and veterinary drug residues, harmful microorganisms, toxic substances, heavy metals, mycotoxin, food allergens, and genetically modified organisms.

Leveraging its advanced international food inspection technologies and extensive testing expertise, the Institute has expanded its service offerings to include food inspection for both domestic and international clients. It also provides technical consultations on food safety, extending its support and knowledge to a broader segment of the food industry.

Accreditation and Certification

The Institute's dedication to high-quality assurance is reflected in its accreditations and certifications. It obtained accreditation from the China National Accreditation Service for Conformity Assessment (CNAS) in November 2010 and achieved the China Inspection Body and Laboratory Mandatory Approval (CMA) in May 2020. The CMA certification, granted after a rigorous evaluation of our testing capabilities and laboratory reliability by provincial and higher-level market regulators under the Evaluation Criteria for Certification of Inspection and Testing Laboratories (RB/T 214-2017), further strengthens our credibility and reinforces stakeholder confidence.

Continuous Improvement

Looking ahead, we will continue to refine our quality assurance processes to align with evolving international standards. Our commitment to continuous improvement remains strong, and we will continue to adopt innovative methods and technologies to ensure the highest levels of food safety and quality.

質量保證系統

自2005年成立以來，食安研一直以來是推動我們質量保證流程的核心機構。其成立旨在強化我們的體系，透過在中國對原材料進行本地檢測，確保使用安全的材料。自成立以來，食安研一直是本集團質量保證策略的重要組成部分，持續提升我們產品的安全與品質。

整合國際先進檢測技術

為強化我們的質量保證體系，食安研引入Nissin Foods Holdings Co., Ltd. (「日清日本」) 旗下全球食品安全研究所的先進食品檢測及分析技術。此項整合顯著提升了我們對原材料(包括麵粉、脫水蔬菜、肉類及海鮮)以及供應予日清日本及本集團中國境內附屬公司的即食麵產品的檢測及分析能力。

我們的檢測計劃涵蓋多項檢查，以確保產品安全與質量，包括農藥及獸藥殘留、有害微生物、有毒物質、重金屬、真菌毒素、食物致敏原及基因改造生物的評估。

憑藉其先進的國際食品檢測技術及豐富的檢測專業知識，食安研已將服務範圍擴大至為國內外客戶提供食品檢測服務。同時，食安研亦就食品安全提供技術諮詢，將其支持及知識惠及更廣泛的食品行業。

認可與認證

食安研對卓越質量保證的堅持，體現於其獲得的認可及認證。食安研於2010年11月獲得中國合格評定國家認可委員會(CNAS)的認可，並於2020年5月獲得中國檢測機構和實驗室強制認證(CMA)。CMA認證由省級及以上市場監管部門根據《檢驗檢測實驗室認證標準》(RB/T 214-2017)對我們的檢測能力及實驗室可靠性進行嚴格評審後授予，進一步鞏固我們的信譽，並增強持份者的信心。

持續改進

未來，我們將持續優化質量保證流程，與不斷演變的國際標準保持一致。我們對持續改進的承諾始終堅定，並將繼續採納創新方法及技術，以確保最高水平的食品安全與質量。

RESPONSIBLE ADVERTISING AND PRODUCT LABELLING

We recognise the strong impact that advertising and product labelling have on consumer trust and perceptions. To uphold this responsibility, we maintain clear and comprehensive guidelines for all advertising and promotional activities, ensuring our communication is transparent, accurate and aligned with the highest standard of ethical marketing.

Ethical Advertising Practices

Our core belief is to stay honest and avoid overstating the features of our products. We view advertising as a moral responsibility – one that requires all communications to be factual, transparent, and not deceptive. This principle is the foundation of the trust we build with our customers.

Consistent with this belief, Nissin Foods continues to champion clarity across all advertising activities. Our communications are designed to accurately reflect our products, align our brand values, and remain consistent across every media channel. This approach safeguards against misrepresentation and ensures that customers gain a clear, truthful understanding of our products and their benefits.

Product Label Monitoring and Updating

We maintain rigorous processes to monitor and update all product labelling, ensuring information remains accurate, current, and fully compliant with evolving regulatory requirements. Central to this effort are our Inspection Procedures for Finished Products, which include detailed reviews of product quantity, packaging, labelling, and overall quality. These checks ensure every element of our product presentation is thoroughly verified for precision and compliance.

Compliance with Regulations

We demonstrate our product responsibility by adhering to all applicable regulations. Our operations follow the Trade Descriptions Ordinance in Hong Kong and the Administrative Provisions on Food Labelling in the Chinese Mainland as the foundation of our compliance framework. Throughout the reporting period, we have recorded no breaches of product responsibility requirements, and no fines or penalties were incurred for non-compliance.

NUTRITIOUS AND HEALTHIER PRODUCTS

Nissin Foods has long championed the importance of health and nutrition, recognising evolving consumer preferences and the global shift toward healthier eating habits. While instant noodles remain our core product, valued for their convenience and affordability, we have steadily expanded our portfolio to offer options that meet the needs of health-conscious consumers. This diversification enables us to better contribute to welfare by expanding nutritious food choices.

Health and nutrition are central to our vision. Our Chairman contributes to industry advancement through his roles as a guest member on the standing committee of a Tier 1 association and as vice president of a Tier II association within the Noodle Products Branch of the Chinese Institute of Food Science and Technology.

As we continue to enhance the nutritional value of our products, we remain dedicated to preserving the signature taste and quality that define Nissin Foods, ensuring our customers can enjoy healthier choices without compromise.

負責任的廣告與產品標籤

我們深知廣告及產品標籤對消費者信任與觀感的重大影響。為履行此責任，我們為所有廣告及推廣活動制定清晰全面的指引，確保我們的傳播內容透明、準確，並符合最高標準的道德營銷規範。

道德廣告實踐

我們的核心信念是保持誠實，避免誇大產品特性。我們視廣告為一項道德責任 – 要求所有傳播內容必須真實、透明，且不具欺騙性。此原則是我們與顧客建立信任的基石。

秉持此信念，日清食品在所有廣告活動中持續倡導清晰透明的原則。我們的傳播內容旨在準確反映產品，體現品牌價值，並在各個媒體渠道保持一致。此方針可防止失實陳述，確保顧客對我們的產品及其益處獲得清晰、真實的了解。

產品標籤監察與更新

我們維持嚴謹的流程，監察及更新所有產品標籤，確保信息準確、適時，並完全符合不斷演變的監管要求。《製成品檢查程序》在此項工作中發揮核心作用，當中包括對產品數量、包裝、標籤及整體質量的細致審查。該等檢查確保產品展示的每個要素均經過嚴格核實，以確保準確性及合規性。

遵守法規

我們遵守所有適用法規，彰顯對產品的責任擔當。在香港，我們的營運遵循《商品說明條例》；在中國內地，則以《食品標籤管理規定》作為合規框架的基礎。於報告期內，我們並無違反產品責任要求的記錄，亦無因不合規而被處以罰款或處罰。

產品營養均衡且更健康

日清食品長期重視健康與營養的重要性，並意識到消費者偏好不斷演變，以及全球飲食習慣正趨向更健康的選擇。雖然即食麵仍是我們的核心產品，因其便利與經濟實惠而深受歡迎，但我們持續擴展產品組合，提供滿足注重健康消費者需求的選擇。此多元化策略使我們能夠透過增加營養食品的選擇，更好地為大眾福祉作出貢獻。

健康與營養是我們願景的核心。我們的董事長現擔任中國食品科學技術學會一級協會的特邀常務理事及面製品分會二級協會的副理事長，為行業發展作出貢獻。

在持續提升產品營養價值的同時，我們始終致力於保留日清食品標誌性的口味與品質，確保顧客能夠享用更健康的選擇，而無需在美味與健康之間取捨。

OUR PRODUCT 我們的產品

Salt and Sugar Reduction

Improving the nutritional profile of packaged food products is an integral component of Nissin Foods' product stewardship approach. During the reporting period, the Group continued to advance its salt and sugar reduction efforts, with particular emphasis on sodium reduction in its core instant noodle portfolio. Although instant noodles are not the predominant source of dietary salt intake, the Group recognises its responsibility as a leading manufacturer to contribute to broader public health objectives by progressively enhancing product formulations while safeguarding product quality and consumer acceptance.

Between April 2019 and March 2024, Nissin Foods participated as a member of the Committee on Reduction of Salt and Sugar in Food (CRSS), a multi-stakeholder platform established to encourage the food industry to lower salt and sugar levels across commonly consumed products. In alignment with the CRSS's objectives, the Group established a clear target to reduce the salt content by 20% in 70% of its instant noodle products sold in Hong Kong.

To ensure that nutritional improvements would not compromise consumer experience, Nissin Foods adopted a structured and incremental reformulation strategy. Rather than implementing an immediate and substantial reduction, which could materially alter taste perception, salt content was reduced progressively, typically by approximately 3–5% per adjustment cycle.

In 2025, the Group successfully achieved its target of reducing salt content by 20% in 70% of its instant noodle products sold in Hong Kong, as a result of the persistent and coordinated efforts across our research and development, quality assurance, procurement and marketing functions to reformulate products responsibly and at scale.

Our Innovative Product Range

Baked Grain Crispy Roll 21

Nissin Foods expanded its innovative product portfolio with the Baked Grain Crispy Roll 21, made by our new subsidiary, Kemy Food, and introduced it to the Hong Kong market in 2025. Available in popular cheese and chocolate flavours, the Baked Grain Crispy Roll 21 delivers a healthier snacking option without compromising taste. Designed for health-conscious consumers seeking convenient, on-the-go options, its individual packaging and healthy formulation highlight our efforts to deliver innovative products that cater to evolving consumer preferences.

減鹽與減糖

提升包裝食品的營養價值，是日清食品產品責任方針的重要組成部分。於報告期內，本集團持續推進減鹽及減糖工作，尤其重視降低核心即食麵產品的鈉含量。儘管即食麵並非日常鹽分攝入的主要來源，但本集團作為領先的製造商，深知有責任逐步改良產品配方，在保障產品質量及消費者接受度的同時，為實現更廣泛的公共健康目標貢獻力量。

於2019年4月至2024年3月期間，日清食品以成員身份參與降低食物中鹽和糖委員會(CRSS)的工作。該委員會是一個多方持份者平台，旨在鼓勵食品行業降低常見食品的鹽糖含量。為配合CRSS的目標，本集團訂立了明確目標，在香港銷售的70%即食麵產品的鹽含量降低20%。

為確保營養改良不會影響消費者的體驗，日清食品採取了結構化、循序漸進的配方改良策略。我們並非一次性大幅降低鹽含量(此舉可能顯著改變口味觀感)，而是逐步減少鹽分，通常每個調整週期約降低3%至5%。

於2025年，本集團成功實現了將香港銷售的70%即食麵產品鹽含量降低20%的目標。這是我們研發、質量保證、採購及市場營銷等職能部門持續協作努力的成果，共同推動產品配方在負責任及規模化的基礎上實現改良。

RESPONSIBLE VALUE CHAIN

Our products depend on a supply chain that sources high-quality agricultural raw materials, ingredients, and packaging. We maintain a comprehensive approach to sustainable supply chain management, including rigorous supplier selection, continuous process enhancements, and a growing commitment to environmentally responsible procurement. These practices ensure that every stage, from sourcing to final delivery, upholds strong standards of environmental stewardship and ethical conduct.

SUPPLIER SELECTION AND MANAGEMENT

Our supplier selection and management practices are built on a comprehensive, multi-layered framework that ensures quality, efficiency, and alignment with our Materials Procurement Policy and Material Purchase Policy, thereby maintaining strict standards for sourcing and purchasing activities. In 2025, our global supply network comprised of 995 suppliers, with 727 in Chinese Mainland, 82 in Hong Kong, and 186 in other regions.

During procurement, we require all suppliers to comply with the necessary stringent safety and quality standards for raw materials, packaging, and finished products. Our evaluation procedures ensure that every input meets our strict benchmarks before entering production.

Beyond traditional criteria such as quality, cost, and delivery performance, we increasingly prioritise sustainability factors in the supplier screening process, including environmental stewardship and social responsibility. Suppliers are expected to adhere to our internal environmental guidelines and performance targets, ensuring our supply chain remains efficient, ethical, and environmentally responsible.

Annual Performance Review and Logistics Management

An annual evaluation is conducted on all suppliers using a detailed scoring system that assesses performance, product delivery, and regulatory compliance. Suppliers that meet our standards remain on our approved vendor list, while those requiring improvement receive targeted feedback to strengthen their capabilities. In parallel, our operations team continually enhances logistics management to ensure timely, high-quality deliveries, supported by clear performance metrics for our logistics partners.

Our storage facilities are equipped with appropriate infrastructure and temperature control systems to safeguard product quality. We also have robust security measures, including round-the-clock monitoring and alarm systems, to further ensure the protection and integrity of all materials throughout the supply chain.

負責任的價值鏈

我們的產品依賴於採購高品質農產品原材料、配料及包裝材料的供應鏈。我們對可持續供應鏈管理採取全面方針，包括嚴格的供應商篩選、持續的流程優化，以及日益重視環保採購。該等實踐確保從採購到最終交付的每個環節均恪守環境管理及道德行為的高標準。

供應商篩選及管理

我們的供應商篩選及管理實務，建基於全面、多層次的框架，以確保質量、效益，並符合我們的《物料採購守則》及《物料購買守則》，從而在採購活動中維持嚴格的標準。於2025年，我們的全球供應網絡共有995家供應商，其中727家位於中國內地，82家位於香港，186家位於其他地區。

在採購過程中，我們要求所有供應商遵守原材料、包裝及製成品方面必要的安全及質量嚴格標準。我們的評估程序確保每一項投入在進入生產前均符合我們的嚴格基準。

除質量、成本及交付表現等傳統標準外，我們在供應商篩選過程中日益重視可持續發展因素，包括環境管理及社會責任。供應商須遵守我們的內部環保指引及表現目標，確保我們的供應鏈保持高效、合乎道德且具環境責任。

年度表現評估及物流管理

我們採用詳細的評分系統，對所有供應商進行年度評估，評核其表現、產品交付及法規合規情況。符合我們標準的供應商將保留在認可供應商名單上，而需要改進的供應商則會收到針對性反饋，以提升其能力。與此同時，我們的營運團隊持續優化物流管理，確保及時、高品質的交付，並輔以清晰的物流合作夥伴表現指標。

我們的倉儲設施配備適當的基礎設施及溫度控制系統，以保障產品質量。我們亦設有穩健的安全措施，包括全天候監控及警報系統，進一步確保所有物料在整個供應鏈中的安全與完整性。

Assessment of Material Suppliers

Selecting our major raw material suppliers involves a comprehensive assessment of their financial stability, supply capabilities, quality standards, and environmental practices to ensure they meet both our operational needs and our environmental and safety expectations. Suppliers classified as “Major Material Suppliers” are those we purchase from in excess of a specified amount annually. They undergo an annual credit review conducted by our Finance Department to confirm their financial reliability. The Purchasing Department then evaluates these findings and finalises approvals, while closely monitoring any changes in their credit status.

Delivery Management

We take extra care in managing delivery delays by reviewing affected suppliers’ core production processes to identify and resolve root causes. For key raw material suppliers, we conduct on-site assessments and provide targeted improvement recommendations. When delays persist, we issue formal warnings and reduce order volumes to prevent repeat issues. We also quantify and communicate the financial impact of delays to encourage timely corrective actions.

Nissin Foods places a strong emphasis on ensuring order accuracy. Our teams routinely verify that material suppliers operate their equipment effectively. They also ensure finished and semi-finished quantities are communicated accurately, supported by real-time data collection to keep our supply chain running smoothly. Moreover, we assess each supplier’s ability to manage quantity discrepancies and require robust systems to address such issues. When standards are not met, we provide clear guidance and directions. However, if a supplier repeatedly fails to meet expectations, we may consider alternative suppliers to maintain the quality and efficiency of our supply chain.

Sustainable Procurement

Recognising that our procurement decisions have a significant impact on the environment and the communities we serve, we are continuing to strengthen our sustainable procurement efforts and making them a core part of our corporate responsibility. At Nissin Foods, we are dedicated to sourcing products and materials that are environmentally responsible and ethically produced. By partnering with suppliers who share these values, we aim to reduce our emissions, support positive social outcomes and meet the rising expectations of our consumers and stakeholders.

物料供應商評估

在甄選主要原材料供應商時，我們會對其財務穩健性、供應能力、質量標準及環保實踐進行全面評估，以確保其同時滿足我們的營運需求以及環境與安全期望。被歸類為「主要原材料供應商」者，是指我們每年向其採購金額超過特定標準的供應商。該等供應商須接受由財務部進行的年度信用審查，以確認其財務可靠性。採購部其後評估審查結果並作出最終審批，同時密切監察其信用狀況的任何變化。

交付管理

我們在處理交付延誤時格外審慎，透過檢視受影響供應商的核心生產流程，識別及解決根本原因。對於主要原材料供應商，我們進行現場評估並提供針對性的改進建議。如延誤持續，我們會發出正式警告並減少訂單量，以防問題重複發生。我們亦量化延誤的財務影響並告知供應商，以促使其及時採取糾正措施。

日清食品高度重視訂單準確性。我們的團隊定期核實物料供應商的設備運作是否有效。同時確保製成品及半成品數量信息傳達準確，並輔以實時數據收集，以保持供應鏈順暢運作。此外，我們評估每家供應商處理數量差異的能力，並要求其設有穩健的系統以應對此類問題。若未能達到標準，我們會提供清晰指引。然而，若供應商屢次未能達到預期，我們可能會考慮更換供應商，以維持供應鏈的質量與效率。

可持續採購

我們認識到採購決策對環境及我們所服務的社區具有重大影響，因此持續加強可持續採購工作，並將其作為企業責任的核心部分。在日清食品，我們始終致力採購對環境負責且以合乎道德方式生產的產品及材料。通過與秉持相同價值觀的供應商合作，我們力爭減少排放，支持積極的社會成果，並滿足消費者及持份者日益提高的期望。

Compliance with Local Laws and Regulations

Our operations in the Chinese Mainland, Hong Kong and other overseas markets are conducted in strict accordance with all applicable local laws and regulatory requirements. The Group maintains a zero-tolerance approach to child labour and forced labour, which is explicitly articulated in our Employee Handbook and relevant internal policies. To proactively prevent such practices, we conduct periodic reviews and internal audits of our operations to identify and address any potential risks relating to labour standards. Should any instances of non-compliance be identified, prompt corrective actions are taken in accordance with our established procedures.

In Hong Kong, our employment practices comply with key legislative requirements, including the Employment Ordinance, the Minimum Wage Ordinance and the Employees' Compensation Ordinance. In the Chinese Mainland, our labour management practices adhere to the Labour Law of the People's Republic of China, the Social Insurance Law of the People's Republic of China, the Employment Promotion Law of the People's Republic of China and the Labour Contract Law of the People's Republic of China. Compliance with these regulatory frameworks forms a fundamental component of our human resources management and helps ensure that employees' rights and welfare are protected across our operations.

To ensure ongoing compliance with the Personal Information Protection Law of the Chinese Mainland, the Group undertook a comprehensive information security evaluation and enhancement initiative in 2024, with particular focus on the management and protection of employee personal information. As part of this initiative, an independent third-party specialist was engaged to assess our internal systems, data management practices and relevant governance procedures. The resulting assessment report confirmed that the Group's subsidiaries in the Chinese Mainland have established appropriate controls to comply with the requirements of the Personal Information Protection Law, thereby strengthening safeguards over personal data and mitigating risks associated with cross-border data transfers.

Over the past reporting year, the Group maintained a strong compliance record with all applicable employment and labour-related laws and regulations in the jurisdictions where we operate, and there were no instances of non-compliance with employment or labour laws within our operations.

OCCUPATIONAL SAFETY AND HEALTH

Occupational Safety and Health (OSH) is always considered a top priority at Nissin Foods. We uphold strict safety rules to protect our employees. Key responsibilities include maintaining awareness of emergency exits, keeping fire doors clear, ensuring escape routes are kept clear at all times and fire doors are kept closed, and promptly reporting any issues with electrical devices. Moreover, all staff must adhere to company hygiene standards to ensure a safe, sanitary workplace.

Our Occupational Safety and Health Policy acts as the core directive for our team, detailing specific procedures that mandate strict adherence across all operational functions. 為確保持續遵守中國內地的《個人信息保護法》，本集團在2024年開展了全面的信息安全評估及提升計劃，尤其聚焦於員工個人信息的管理與保護。作為該計劃的一部分，我們委託獨立第三方專家評估內部系統、數據管理實踐及相關治理程序。最終的評估報告確認，本集團在中國內地的附屬公司已建立適當管控措施，以符合《個人信息保護法》的要求，從而加強對個人數據的保障，並減低與跨境數據傳輸相關的風險。

於過往報告年度內，本集團在我們營運所在的司法管轄區內，始終保持對所有適用的僱傭及勞工相關法律法規的良好合規記錄，且我們的營運中並未發生任何違反僱傭或勞工法律的情況。

This ensures they are fully prepared to manage day-to-day safety and contribute to the effectiveness of our OSH management system, which undergoes regular assessment and continuous improvement. We instill a principle of shared responsibility, expecting every individual to proactively safeguard their own health and safety, as well as the health and safety of others.

Influenza Contingency and Risk Management

The Influenza Contingency Committee (ICC) oversees the review of our emergency response plans and procedures. Assessing risk management and hygiene strategies ensures operational continuity. The ICC also identifies opportunities for enhancement and facilitates dialogue with employees on preventive measures, safeguarding organisational activities and staff welfare.

職安健審核

日清食品持續進行嚴格的現場巡查，以履行我們的職安健承諾。我們的職安健委員會定期召開會議，檢討表現並向管理層提出改進建議。此外，獨立專家每年進行職安健審核，並提供切實可行的建議，以填補我們實踐中的任何不足。

NISSIN FOODS (HONG KONG) CHARITY FUND ("Charity Fund")

The Nissin Foods (Hong Kong) Charity Fund was established in September 2020 through a trust deed by Nissin Foods Company Limited. The Charity Fund is dedicated to advancing education, promoting the arts, science, and academic research, aiding those in need, and conducting charitable activities for the benefit of the Hong Kong community. Since its inaugural set of projects in 2022, the Charity Fund has consistently approved and enhanced its initiatives.

In collaboration with The Chinese University of Hong Kong ("CUHK"), the Charity Fund launched the "Nissin Foods Scholarship" in 2022 for students enrolled in CUHK's Food and Nutritional Sciences programmes. For the 2025-2026 academic year, a total of 11 full scholarships were granted, comprising seven renewed and four new award recipients. Among these, seven are undergraduate students and four are enrolled in CUHK's PhD programme. The scholarship continues to nurture talented, compassionate food professionals and future leaders, supporting the continued advancement of Hong Kong's food industry.

Green Campaigns

Red Packet Reuse and Recycling

In 2025, we took part in the Red Packet Reuse and Recycling Programme organised by Greeners Action. This project promotes the effective reuse and recycling of materials. Each year, Greeners Action collects used red packets and redistributes them to the public for reuse before the Chinese New Year. During the collection period from 3 to 24 February 2025, our plant canteens in Hong Kong collected 15 kg of red packets for recycling, indicating a notable green awareness among staff members.

Guided Tour at T.PARK

To enhance the environmental awareness of our employees, 31 employees from 24 departments across Nissin Foods and Winner Food participated in a guided tour of the T.PARK in October 2025. T.PARK is a unique self-sustained facility that combines a variety of advanced technologies with recreational, educational and ecological features in a single complex. With two plants of 4 incineration trains in the facility, it can handle a maximum capacity of 2,000 tonnes of sludge per day. It demonstrates Hong Kong’s “waste-to-energy” and resource recovery ambitions, offering the best alternative solution for sludge disposal and setting the pace for a more sustainable Hong Kong.

慈善基金與香港教育大學(「教大」)合作，推出「日清食品精英運動員獎學金」。該獎學金計劃特別為修讀教大健康教育(榮譽)學士課程、運動科學及教練榮譽理學士課程及學位教師教育文憑課程的精英運動員而設。2025至2026學年，共有七名傑出教大精英運動員獲頒全額獎學金，包括三名續任得獎者及四名新得獎者。該獎學金旨在支持該等運動員在運動表現及學業上追求卓越成績，讓其日後有望成為優秀的健康教育工作者。

綠色活動

利是封回收重用大行動

於2025年，我們參與了由綠領行動組織的「利是封回收重用大行動」。該項目旨在推廣物料的有效重用及回收。每年，綠領行動收集使用過的利是封，並在農曆新年前再派發予公眾重用。於2025年2月3日至24日收集期內，我們香港廠房的食堂共收集了15公斤利是封作回收用途，反映員工的環保意識顯著提升。

參觀T•PARK 源•區

為提升員工的環保意識，2025年10月，來自日清食品及永南食品24個部門的31名員工參加了T•PARK 源•區的導賞團。T•PARK 源•區是一個創新的自我持續循環設施，將多種先進技術與消閒、教育及生態元素融合於單一綜合設施之中。該設施設有兩個廠房，共四條焚化線，每日可處理高達2,000噸污泥，展現香港「轉廢為能」及資源回收的願景，為污泥處置提供最佳替代方案，引領香港邁向更可持續的未來。

The tour was designed to educate participants about the importance of waste-to-energy, enhance staff awareness of resource recovery, and educate staff about the sludge treatment process.

此次導賞旨在讓參加者了解轉廢為能的重要性，提升員工對資源回收的認識，並加深對污泥處理流程的了解。

Supporting Local Athletes

Sponsorship of Hong Kong's Tennis Competitions

As the official "Youth Development Partner" of the Hong Kong, China Tennis Association ("HKCTA"), Nissin Foods has been a sponsor of key local youth tournaments since 2015. Throughout 2025, we continued to support the local tennis tournaments organised by HKCTA, including the Nissin Hong Kong National Junior Tennis Championships, Nissin Demae Icho Hong Kong Junior Novice Competition, and Nissin Cup Noodles Hong Kong Junior Tennis Series. The tournaments offer budding tennis players valuable competitive opportunities, enabling them to gain extensive experience while also identifying potential elite players for Hong Kong. Our involvement demonstrates our commitment to promoting youth development in sports and fostering a vibrant sporting culture in the Hong Kong society.

Nissin Foods has expanded its support for youth tennis development to the Greater China region by sponsoring the Nissin Greater China National Junior Tennis Team Cup 2025. Eight teams from Greater China: Shanghai, Jiangsu, Tianjin, Shandong, Yunnan, Macau, Chinese Taipei, and Hong Kong – came together for an exhilarating four-day challenge in January 2025. Each team sent three players aged 13 to 14 to compete, learn, and grow together.

支持本地運動員

贊助香港網球賽事

作為中國香港網球總會的官方「青少年發展合作夥伴」，日清食品自2015年起一直贊助本地主要青少年賽事。於2025年，我們繼續支持由中國香港網球總會舉辦的本地網球賽事，包括「日清全港青少年網球錦標賽」、「日清出前一丁青少年網球新秀賽」及「日清合味道全港青少年網球巡迴賽」。該等賽事為嶄露頭角的年輕網球運動員提供寶貴的比賽機會，助其累積豐富經驗，同時為香港發掘潛質優厚的精英運動員。我們的參與彰顯了對推動青少年體育發展及培育香港社會活力體育文化的承諾。

日清食品已將青少年網球發展的支持擴展至大中華地區，贊助了「日清盃」大中華區青少年團體挑戰賽2025。來自大中華地區的八支隊伍—上海、江蘇、天津、山東、雲南、澳門、中華台北及香港—於2025年1月齊聚一堂，參與為期四天的精彩賽事。每支隊伍派出三名13至14歲的選手參賽，共同切磋、學習與成長。

Extends Sponsorship of Local Tennis Stars

Nissin Foods has continued its sponsorship of Hong Kong tennis professional Cody Wong, strengthening its support as she rises in the international tennis scene. The partnership reflects our dedication to nurturing homegrown athletic talent and promoting Hong Kong's presence in global sports.

In 2025, Nissin Foods has extended our sponsorship to the then 14-year-old local tennis rising star Richie Choi. Richie became the first Hong Kong player to reach the finals of the Boys' 12 Singles at the prestigious Orange Bowl International Tennis Championship 2023, finishing as runner-up and making history. In 2024, he represented Hong Kong in several international tournaments, including the ITF World Junior Tennis Finals, the Asia/Oceania Qualifiers, and the European Tour. In 2025, he claimed the Boys' Singles title at the ITF J30 Colombo and won the Boys' 16 title at the Nissin Hong Kong Junior Tennis Championships.

The sponsorships have not only highlighted Nissin Foods' long-term commitment to local sports development but also reinforced its important role as the official Youth Development Partner of HKCTA.

Cody's strong performances have reinforced the value of this collaboration, showcasing how sustained corporate backing can help local athletes compete and excel internationally.

王康怡的出色表現彰顯了此項合作的價值，展現了企業的持續支持如何助力本地運動員在國際賽場上競爭及脫穎而出。

Through these sponsorships and its broader involvement in local tournaments, we aim to empower more Hong Kong athletes and inspire the next generation of sporting talent. The sponsorships also represent a model of collaboration between corporations, sports associations, and young athletes, injecting positive energy into Hong Kong's sports scene.

延長對本地網球精英的贊助

日清食品繼續贊助香港職業網球運動員王康怡，隨著她在國際網壇嶄露頭角，我們進一步加強對她的支持。此項合作體現了我們培育本地體育人才及提升香港在國際體壇地位的決心。

於2025年，日清食品將贊助範圍擴展至當時14歲的本地網球新星蔡富泓。蔡富泓成為首位打入享負盛名的「橙碗國際網球錦標賽2023」B12男子單打決賽的香港選手，最終奪得亞軍，創下歷史。2024年，他代表香港出戰多項國際賽事，包括ITF世界青少年網球總決賽、亞洲大洋洲外圍賽及歐洲巡迴賽。於2025年，他奪得ITF J30哥倫堡站男單冠軍以及日清全港青少年網球錦標賽B16冠軍。

該等贊助不僅彰顯了日清食品對本地體育發展的長期承諾，亦鞏固了其作為中國香港網球總會官方青少年發展合作夥伴的重要角色。

Meanwhile, Richie began playing tennis at the age of five and joined the Shenzhen Tennis Team's youth preparatory squad at seven. He quickly made a name for himself on both local and international courts.

而蔡富泓五歲開始學習網球，七歲加入深圳網球隊少年預備組，迅即在本埠及國際賽場上嶄露頭角。

透過上述贊助及更廣泛參與本地賽事，我們希望能為更多香港運動員提供支持，並鼓舞下一代的體育人才。同時，該等贊助亦構建企業、體育協會與青年運動員之間的合作模式典範，為香港體壇注入正能量。

2 Figures marked with "*" have been restated to reflect updates to calculation methodologies and boundary definitions: Scope 2 emissions (and the corresponding total Scope 1 and 2 emissions and related intensity metrics) have been recalculated to align with a revised Scope 2 emissions boundary, while indirect energy consumption (and the corresponding total energy consumption and energy intensity metrics) has been recalculated following updates to the classification of energy consumption.

3 The reported Scope 3 emissions cover ten categories: Purchased goods and services, Capital goods, Fuel-and energy-related activities, Upstream transportation and distribution, Waste generated in operations, Business travel, Employee commuting, Downstream transportation and distribution, Use of sold products, and End-of-life treatment of sold products. As we continue to refine our Scope 3 emission disclosure, some of the data is still under collection and not ready to be disclosed this year. Additional categories will be incorporated in future reporting as data availability improves.

2 標有[*]的數字已予重列，以反映計算方法及邊界定義的更新：範圍2排放(以及相應的範圍1及2排放總量和相關密度指標)已根據經修訂的範圍2排放邊界重新計算，而間接能源消耗(以及相應的能源消耗總計及能源密度指標)已於能源消耗的分類更新後重新計算。

3 報告的範圍3排放涵蓋10個類別：購買的商品及服務、資本貨物、燃料及能源相關活動、上游運輸及配送、運營過程中產生的廢棄物、商務差旅、員工通勤、下游運輸及配送、已銷售產品的使用，以及已銷售產品的廢棄處理。由於我們持續完善範圍3排放的披露工作，部分數據仍在收集中，尚未能於本年內披露。待數據可用性提升後，將在未來的報告中納入更多類別。
